

FS100

1" Flush Seam panels are ideal for wall, soffit, and fascia applications.

The 1" deep panel, manufactured with vented or smooth profile.

- **Optimal Panel Width:** 8", 12"
- **Max Panel Length:** 30' (Consult SMWA for longer lengths)
- **Application:** Walls, Soffit, Fascia
- **Material:** Standard 24 Gauge Steel (Consult SMWA for optional material gauges)
- [Color Chart](#)
- **Optional:** Vented

"Oil canning" is an inherent character of steel and metal products cause by variations in substrate and relative reflectivity of the material and is not cause for rejection. Narrow panel widths, striations, stiffening ribs, and embossing help prevent this problem.
