April 19, 2024

Neil Jackson, Founder, CEO  
N Brereton Medical Technologies  
1071 Gables Drive, Ste101  
Forest, VA 24551

To Whom It May Concern:

I write to support the efforts of N Brereton Medical Technologies to assist in the fight against the synthetic opioid addiction crisis facing our nation.

I recently had the pleasure of meeting with CEO Neil Jackson who shared his personal story about becoming addicted to fentanyl patches after going through extensive surgery and cancer treatment. After realizing his dependence on fentanyl, he desired to be free of the control the addiction had taken on his life. He used his own situation to develop the product that is now known as FenBlock, to break his own addiction, and is now working to bring this solution to market.

After four plus years of research and product development, the company has gained approval to use a 3M non-transdermal material for the FenBlock device. According to Mr. Jackson, their plan is to market initially to doctors, our military, veterans, federal and state departments of corrections and Indigenous Americans for prescribed use.

It is my hope that FenBlock is able to be an important part of ending fentanyl addiction in America.

Sincerely,

Member of Congress
