LMS

Customized White-labelling / SaaS

- Our LMS is a Cloud Hybrid Learning Management System
- Seamless Integration of Live and E-learning platform
- Customizable to business needs
- It is an application that is used to administer, track performances, report findings and deliver training. Users can access information, training materials, work related documents and much more through LMS.
- Easy to use and to create curriculum without coding
- Internationalize your brand
- Collaborating wih other content creators
- It is designed and built to help Organisation, Companies, Schools and Institutions to expand their reach, to ignore borders, and to access relevant real-time answer in their quest for knowledge.

LCO Functions

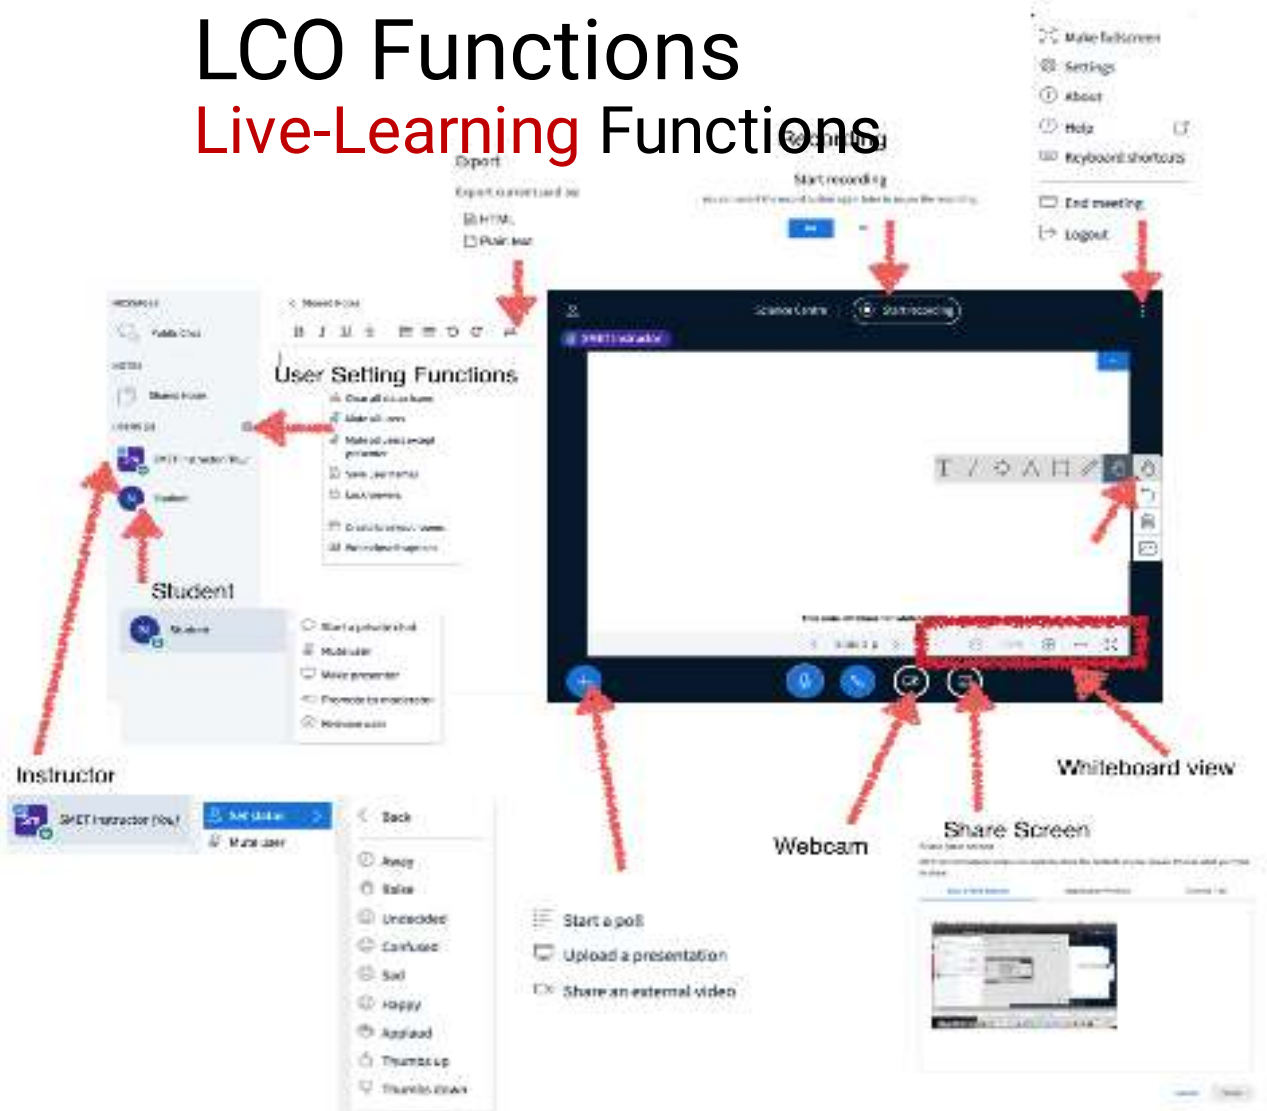
Live-Learning Functions



- **Shared Notes :**

In addition to private and public chats, all users can access the shared note panel.
This enable all users in the room to contribute to a common text-based file with a few formatting options and the ability to export said notes later.

- **Trainer-centric User Settings :**

You may change/edit the room settings “live”. There is no need to preset your rooms. This functions include, breakout rooms, whiteboard and poll, etc.

- **Record and playback feature :**

In a session with recording enabled, the feature will save the slides, chat, audio, desktop, whiteboard events and webcam for processing later. This will be saved in the cloud. You may access this at anytime in the course curriculum.
