PAST PERFORMANCE

With over two decades of government consulting experience, our founder has successfully led and supported projects across multiple federal agencies, including the Department of Defense, Army, Navy, Marine Corps, and Air Force, US Army Corps of Engineers, and US Postal Service, and has worked as a civilian within the US Coast Guard Response Division.

This extensive background encompasses a broad range of sectors, such as environmental management, health and safety regulations, quality control, and business process optimization. Our hands-on experience includes:

- **ENVIRONMENTAL CONSULTING:** Developed and implemented assessment and sustainability strategies for military training ranges ensuring adequate training lands for future operations.
- **HEALTH AND SAFETY OVERSIGHT:** Directed comprehensive safety programs for the US Coast Guard during major oil spills and hazardous materials releases, as well as provided oversight for anthrax investigation teams for the US Postal Service.
- **QUALITY CONTROL MANAGEMENT:** Ensured the highest standards of project quality and compliance for the US Army Environmental Center munitions studies, DoD Toxics Release Inventory Data Delivery System development, and Marine Corps modeling inputs, ensuring thorough and accurate assessment the environmental fate of munitions constituents.
- **RESPONSE AND RECOVERY:** Provided oversight of debris removal protocols and field teams during hurricane responses for the US Army Corps of Engineers, and contractor oversight for the US Coast Guard.
- **PLANNING AND SUSTAINABILITY:** Performed environmental assessments for the Comite River Diversion, as well as management of major coastal restoration projects for the US Army Corps of Engineers.
