# The BSICS 99Math Competition

## Nov 6th Class Champion

On this day, all students should compete within their class is to determine who is #1 within their class. It is recommended to do at least 3 sessions or some type of elimination method to determine the class winner. This student will then compete with others within their campus the following week.

## Nov 13th Top In Each Grade

The top student from each grade will compete with the others at their campus. The top 3 scorers will move on to the final round. These students will compete using the same game code.

## Nov 20th Cross Campus Championship

The top 3 students from each campus will compete in the championship. These students will compete using the same game code. The first place winner will receive \$100; second will receive \$75; third will receive \$50 and the runner ups will receive \$20.

*All Grades K - 8th can compete. Our goal is to have all students knowing all of their multiplication tables before the school year ends.*
