Reflections Year 1 : Mammogram Prompt

MidJourney v6, personalization : July 2024

Overall results have improved, with more needed.

This will always be a challenging scene to produce.

Let's face it. The physical medical imaging machinery & procedure itself is a bit Weird Science. It's not too surprising that it occasionally still throws out images like the left.
(Emotionally accurate maybe, but a bit creepy & far flung.

In the interval from July 2023 to July 2024:

- Broader racial diversity in characters

- White male doctor trope generally receded

- Pink ballgown trope mostly receded

- Medical provider & patient interactions more realistic

- Sometimes confuses mammogram & optical exams

May & June 2024's runs are nearest fidelity to date.
