The Great Big Dog Behavior Seminar

Do you and your staff work with complex dog behavior problems?

Would you like to better understand the many reasons why dogs engage in unwanted destructive, dangerous and fearful behaviors?

In this two-day seminar, you'll decode complex dog behavior issues with Dr. Pachel and learn practical, effective techniques to use when working with dogs displaying fear, anxiety or aggression.

You'll learn about the physical, physiological, and environmental influences on dog behavior, from puppyhood through senior dogs (and everything in between).

Cost: \$125

For more information or to register contact farpointsfarm@gmail.com

WSU Cooperative Extension, 222 N Havana, Spokane 99202

Lower level; parking is free

Lunch will be provided both days

Great Big Dog Behavior Seminar

September 26 - 27, 2020

9am - 4pm

Day 1: From Puppy Breath to Grey Muzzles

- Windows of Opportunity: Canine socialization
- Adolescent Behavior, Part 1: Physiological development of 'canine teenagers'
- Adolescent Behavior, Part 2: Interventions and methods for adolescent dogs
- Grey Muzzles: Age-related changes in behavior in senior dogs

Day 2: From Theory to Practice

- Do you see what I see: Medical issues that present as 'bad' behavior
- Impact of fear & anxiety on learning
- Desensitization & Counterconditioning: The details make the difference
- All in the family: The impact of family dynamics on behavior assessment & intervention
