

BEAUTIFUL HAIR & SKIN POWERED BY PEPTIDES

BioTE Cosmeceuticals use peptides to improve the health of your patients' hair and skin.

HAIR RESCUE: REPAIR HAIR FOLLICLE PEPTIDE SERUM

Helps Retain Hair Follicles for a Longer Duration¹

Increase Hair Count & Hair Mass Index¹

Reduces Hair Loss Associated With Zinc Deficiency¹

Strengthen and keep the hair you have with HAIR RESCUE: REPAIR from BioTE Medical. This specially formulated cosmeceutical was created to help retain hair follicles and promote thicker, fuller hair.

HAIR RESCUE: REPAIR works by combining two potent peptide combinations, GHK-Cu and Zn-Thymulin. In studies, GHK-Cu has been shown to strengthen existing hair by stimulating growth in areas that are lacking thickness. Zn-Thymulin is a combination of Zinc and a nonapeptide called Thymulin. Together, Zn-Thymulin has been shown to extend the anagen phase of hair follicles and reduce hair loss associated with a zinc deficiency.

HAIR RESCUE: ACTIVATE PEPTIDE HAIR GROWTH COMPLEX

Reduces DHT-Induced Hair Follicle Miniaturization¹

Promotes Hair Cell Proliferation¹

Encourages Normal Hair Follicle Development¹

Encourage hair growth at a cellular level with HAIR RESCUE: ACTIVATE from BioTE Medical. This specially formulated topical serum was created to help stimulate hair growth and reduce issues commonly associated with hair loss.

HAIR RESCUE: ACTIVATE combines a potent hair-stimulating peptide, PTD-DBM with Methyl Vanillate to provide a multi-approach solution to hair loss. Research shows these ingredients work synergistically to activate Wnt/ β -catenin pathways and reduce DHT-induced hair follicle miniaturization associated with male pattern baldness. This formula has been shown to stimulate normal hair growth and promote hair cell proliferation—helping hair appear thicker and fuller in as little as five weeks.

LUMINATE COLLAGEN STIMULATING PEPTIDE SERUM

Stimulates Collagen Production¹

Reduces the Appearance of Wrinkles¹

Promotes Healthy Skin¹

Improve the health and appearance of your skin with LUMINATE from BioTE Medical. This powerful collagen-stimulating peptide serum combines three fast-acting peptides (GHK-Cu, Argireline, and Leuphasyl) to help reduce the appearance of wrinkles and promote firmer, healthier skin that glows.

GHK-Cu is a naturally occurring copper peptide that stimulates collagen and glycosaminoglycan synthesis to help reduce wrinkles and fine lines in the skin.

Argireline is a smaller subsection of the Botox peptide sequence, and like the larger molecule, works to reduce expression lines and wrinkles by blocking nerve to muscle messaging.

Leuphasyl is a pentapeptide that helps inhibit the release of acetylcholine in the synapses to reduce muscle contractions, which also reduces the appearance of wrinkles.

LUMINATE can help firm, lift, and smooth the skin by combining these three well-researched peptide molecules into a single topical cream. Luminate may also help reinforce the skin's support structure by promoting cell turnover, enhancing skin clarity, and reducing muscle tension and contraction. With its anti-aging and clarifying properties, this peptide serum makes the perfect addition to any skincare regiment.
