NEW YEAR FRESH START

Preventative Maintenance

How to Clean a Bathroom Exhaust Fan?

You should clean your bathroom's exhaust fan at least once a year. Before starting, shut off the power to the fan at the circuit box. Stand on a sturdy step stool to get a good look at

the grate that covers your fan. It might be held in place by screws, but most modern fan grates are held in place with easy-to-remove tension clips that don't require tools. After removing the grate, wash it with warm water and dish soap. Remove as much dust as possible from the fan assembly using a vacuum wand attachment or a can of compressed air. Follow up with a dusting cloth to get whatever dust remains. After that, just dry and replace the grate. Don't forget to turn the circuit breaker back on!

How to Dispose of Cooking Oil and Grease

No Wipes Down the Pipes

Even if a product says it is "flushable" ...

Unless it is toilet paper, it should not be flushed!

- Diapers (including cloth, cotton, disposable, or plastic)
- Flushable, disposable, cleaning, or baby wipes
- Paper towels, cloth towels, or any type of rag
- Feminine hygiene products
- Facial Tissues

Place the items listed above in a trash can

Putting these items down toilets may plug sewers and cause raw sewage to back up into **YOUR HOME**
