

How to Protect Yourself & Others from COVID-19

Wear a cloth face cover in public

Cover your mouth and nose with a cloth face cover when around others and out in public, such as the grocery store.

Do NOT use a facemask meant for a healthcare worker.

Don't place a cloth face cover on young children under age 2, anyone who has trouble breathing, or any who is unable to remove the mask without assistance.

Why? You could spread COVID-19 to others even if you do not feel sick. The cloth face cover is meant to protect other people in case you are infected.

Avoid touching eyes, nose and mouth.

Why? Hands touch many surfaces and can pick up viruses. Once contaminated, hands can transfer the virus to your eyes, nose or mouth.

Wash your hands often:

- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, **use a hand sanitizer that contains at least 60% alcohol**. Cover all surfaces of your hands and rub them together until they feel dry.

Practice social distancing

If you are around other people, keep 6 feet between you when possible. Avoid hugs, handshakes, large gatherings and close quarters.

Why? The virus is thought to spread mainly from person-to-person. When someone coughs or sneezes, they spray small liquid droplets from their nose or mouth, which may contain the virus. If you are too close, you can breathe in the droplets, including the coronavirus if the person coughing has the disease.

Preventative Maintenance

How to Clean a Bathroom Exhaust Fan? You should clean your bathroom's exhaust fan at least once a year. Before starting, shut off the power to the fan at the circuit box. Stand on a sturdy step stool to get a good look at the grate that covers your fan. It might be held in place by screws, but most modern fan grates are held in place with easy-to-remove tension clips that don't require tools. After removing the grate, wash it with warm water and dish soap. Remove as much dust as possible from the fan assembly using a vacuum wand attachment or a can of compressed air. Follow up with a dusting cloth to get whatever dust remains. After that, just dry and replace the grate. Don't forget to turn the circuit breaker back on!

How to clean and prevent your AC from clogging

As we move forward from Covid- 19 keep in mind we are approaching hurricane season. That being said let's start prepping in advance and have our check list ready. Residents please be sure there are no loose items left in the patios, balconies or in the common areas. Thank you for your anticipated cooperation!
