hey!
it's karina

thank you so much for considering
me to capture your wedding day!

ever since I was little, I've been
passionate about photography,
capturing moments and storytelling

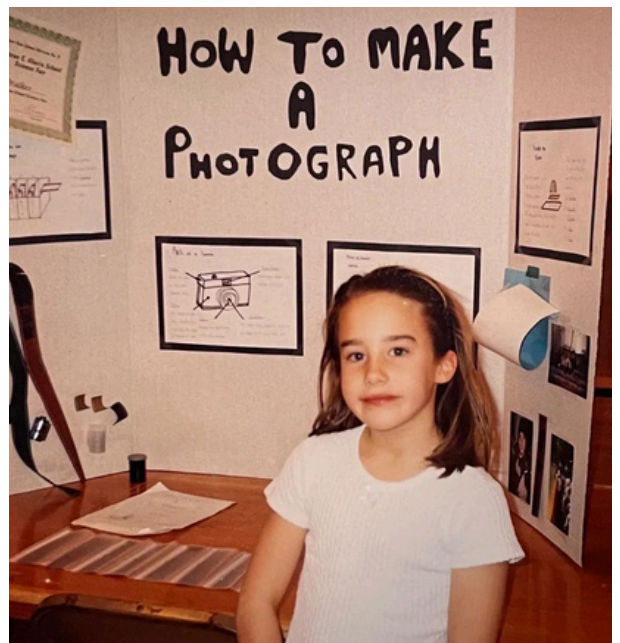

on this important day, I want to keep
you engaged and in the moment, so
you can leave the memory
preserving to me

I'm here to help loved ones capture
memories to feel years later and to
make sure you can relive your
special day again and again!

by 2026 I'll have experience with
over 100 weddings as both a
photographer and videographer

guide contents

- about me 2 - 3
- wedding photography 4 - 9
- wedding videography 10 - 11
- photo + video combo 12
- more information 13

my niches

being both a photographer and a videographer

knowing both sides of my camera has given me a better understanding of storytelling, more confidence in creating and a wider skill set

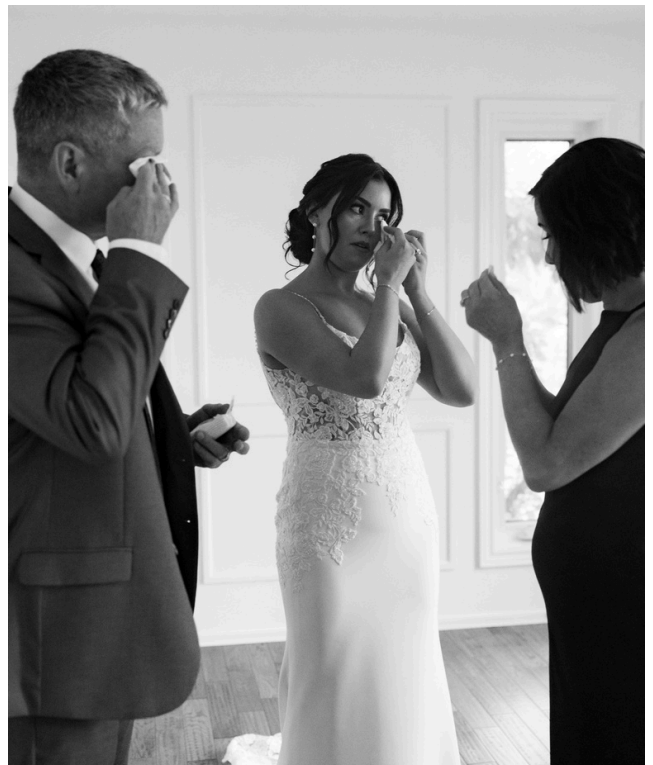

as a photographer, I look for art in everything
as a videographer, I look for movement that makes me feel something

understanding how the details make up the day, making sure those little pieces of love and large contributions of effort are captured

the art of noticing and anticipating moments for those emotional reactions and genuine candids

we will be together the entire day and I genuinely want you to feel your best, be at ease, having fun and make sure things run as smooth as possible!

it's not in the traditional "job description" as to help to help talk a bridesmaid down from being anxious to give a speech, or to help track down the number of a bartender who hasn't shown up on time, or to make sure grandma is sitting in the right spot during the ceremony, but these are the little things I naturally want to help with **because I'll be emotionally invested in these moment for you too**

wedding photography

photos become our legacy

it's how we reminisce, share stories and feel nostalgic

I love a mix of emotional moments, real and raw memories, while also getting those pinterest board shots (ps please invite me to your wedding board!)

the good stuff that gets me in my feels:

my love for timeless black and white images

you'll receive duplicates of my favourites in both colour and black and white

if you love film style photography, love to replicate film in some more artsy images

bringing along my polaroid camera to snap instant photos throughout your day

being there to capture raw moments for years to come
