Re: Business Development

Dear Shareholders,

The management is pleased to announce that Vectrance Group Field technical services platform is ready and operational (name of the platform = RDMC). It means that we can start the deployment of projects on-site any time from now through our network of 1000+ certified technicians covering many countries across Europe, including U.K. Italy, Netherlands, France and other European countries. The platform is called Vectrance-NaphtoMines.

Our field technical services platform is made not only for EV charging stations projects, but also IT, Telecom, smart city, and PV projects.

Sincerely,
The Management
