By day I am a Respiratory Therapist by night I am a paranormal investigator. SNAPIT was founded in 2008 for the purpose of house investigations and trips to investigate haunted and unusual reporting's within the United States. Today SNAPIT has extended its purpose to include education, partnering up with other individuals and groups to extend awareness and scientific research using state of the equipment.

I currently head up SNAPIT's team and continue my studies on paranormal activities and spirit energy. I have written papers on How do Ghost manifest, Entity attachment, Poltergeist, Possession and Intrusion, Shadow People and Cleansing and Sage, all has been recognized by major institutions of paranormal studies.

I believe paranormal research and studies can add mutual aid to those struggling with spiritual phenomena and experiences that are left unanswered. The many facets in this field of study can bring answers and understanding to the continuation of the souls next experience.

SNAPIT currently is merging our resources with Hands on Paranormal to be able to offer a fuller and more expansive collection of paranormal resources and education.

SNAPIT has filmed a reality show in our home location as well as offered Seances, Investigations, Spirit Fests, Paranormal Expo's and workshops.

We use equipment that is certified for paranormal use and verify our finding through extensive screening using qualified personnel. We have on our staff a camera professional, our own international medium, experience team coordinators to handle our instruments and a trained communicator for all of our reveals.

Our home base is a Funeral home turned church. We are located in Cicero and schedule public investigations of this mob based haunted church.

I personally invite you to attend our events, our doors are open to the public and please friend us on Facebook.
