Virtual reality (VR) is an artificial environment that is created with software and presented to the user in such a way that the user suspends belief and accepts it as a real environment. On a computer, virtual reality is primarily experienced through two of the five senses: sight and sound. (Exceptional for Educational/Medical/Emergency Services/Training).

Augmented reality (AR) is an interactive experience of a real-world environment where the objects that reside in the real world are enhanced by computer-generated perceptual information, sometimes across multiple sensory modalities, including visual, auditory, haptic, somatosensory and olfactory. (Exceptional as a Promotional Tool/BUSINESS/Commerce. Instruction Manual step by step instruction for your business. Great tool to display manuals and instructions on how to use any apparatus).

Artificial intelligence (AI) is the ability of a computer program or a machine to think and learn. It is also a field of study which tries to make computers "smart". ... As machines become increasingly capable, mental facilities once thought to require intelligence are removed from the definition. (Exceptional Good Tool For Optimizing Virtual Reality and Augmented Platforms. Great way to enhance data bases to become self generating. (AI) is the new science being used in all commercial and industrial applications).

Virtual Tours (360 VideoTechnology. VT) Virtual tours are a link between two or more 360-degree panoramas that allow the viewer to move from one interactive photo to the other. This works on all devices, whether it's a desktop or laptop computer, a tablet, phone or a VR headset like Google Cardboard, Samsung Gear VR, and Oculus Rift. This is the most fun way to view 360 degree virtual tours.

This technology is exceptional productive for realtors and anyone that requires to showcase large spacious areas without actual having to be there. The 360 VT technology is like being at a particular place without being there.

ALL FOUR TECHNOLOGIES MAY BE COMBINED FOR SPECIFIC APPLICATIONS.

We Write Custom Code To Accommodate Clients Needs. Excellent For Training Purposes. Teaching Tool. Marketing and Promotions.
