

# Commercial Center Vision

**Sunday, March 04, 2007**

**8:11 PM**

The purpose of this Vision is to create the energy needed for change, this is our vehicle so the Universe can take our order, and it has, we see this is how dreams and visions come to life, one must dream it into existence, this is how we have all the great things in life we have today. WE operate under the law of attraction, so have your employees, friends, family say this together at least once per month. Visualize all that you desire, this works for anything and everything in life, it's not a new concept, in fact it's very old, old as time itself. We are creators of the dreams we hold deep inside, there is no reason not to be great, or to live to ones full potential, but forget not to be grateful in heart for this is Humility. There is no reason we cannot bring the spiritual into our everyday, every interaction. This applies to anyone, any religion, the law of attraction, we are what we think, we create what we think, life is because we think it is so, it is only by each individuals perception that life exists, and although we may not be able to agree on all things nor should we, we can agree that dreams are so important and if we did not have forward thinkers who did not mind sharing there vision with us, we would not have any of the wonders of the modern world today that we appreciate, so dear Reader help us to live our dreams, and hold in your thought the best and highest good for us, and hold this vision in your minds eye for what we are in the process of creating now, and so it is Thank You!!!

Dear Creator, Thank you so much as we have created our small business association, with over 100 members and growing, each donating at least \$1,000 per year, our annual operating budget is well over \$100,000, and we have more than enough always to do all we desire and wish to do, its as if by magic we have the golden touch. We have a great shopping center website, filled with a wonderful directory, calendar of events, community events, sales, printable coupons, flyers, and wonderful photos and graphics. We have created a wonderful tribute to the evolution of business at this center since its beginning in 1960, and many previous owners have come forward with business clippings, stories and photos that we have been able to put together an interesting story of life in business, each month we feature a different business owner, and business and promote to the public through our publication, it's a great success. We have created a special savings club for the public by joining our Shopping Mall VIP club with discounts to many wonderful services here at the center. We have an excellent business plan, and marketing plan. We have created a wonderful and new strong business, and offer needed support services to all the businesses at the commercial center, and we are a wonderful resource to surrounding business, and we are an advocate for shopping centers worldwide to organize and for business people to work together for the good of all concerned. The commercial center is so beautiful with well painted curbs, new signs all around, artificial grasses in all the medians, and an international themed sculpture Garden that has received National and World Wide Acclaim. We have bridged the cultural gap and became a unified force of eclectic

businesses that is a model for many. We have beautiful murals on what used to be baron walls, and employed the talents of Art Students, and featured Acclaimed Artists who were more than happy to donate to this community service. We have preserved a historic shopping and commerce center of Las Vegas. One remaining vestige of a time passed, now renewed and even better than before. Our Murals are full of light, we have drawn to us the finest in the Arts Community, and have opened Art Galleries, acting, and voice lessons, and our center is rich in the Arts. All businesses are full all the time day and night; business is at an all time peak. It's so wonderful, so many tourists and locals come here. Our international Art Garden is a success, Tour busses come and drop people off that get a chance to walk around and see the art, taste the food, shop the stores, everyone benefits. We keep up the parking lots, and blocks around us, it's always so clean, and it seems to just shine! Everything is always so immaculate; people are amazed at the grand changes and new theme. The business owners are so happy, they have more business than they can handle and there accounts are overflowing, and there is more than enough money to go around, so they graciously endow the association with high honors, and monies to keep the good work up. We have all kinds of events, that go and all kinds of people come out to see. It's wonderful and fun. All the storefronts are clean, and every business has upgraded their interiors. We are just as good as the finest shopping centers worldwide with the added bonus of having a rich history and originality that surpasses all. We are pioneers of the New Millennium and created a new trend of integrating Art and Business. The Commercial Center has become more than it ever was before, it is now living its purpose and redefined its purpose and living its destiny. All suites are 100% full, there is a yearlong waiting list for events, and to lease space, many people want in on the success, and want to know how we did it. We share with them freely for their benefit and we are thanked richly; we have been featured in many prominent magazines, fortune 500, and Various Shows, like CNN, Oprah, and Discovery. WE are very Chic, Hip, and cool! Like Hollywood, Manhattan, Soho, Paris, we have created a lasting theme and place, where people know worldwide the uniqueness and diversity of this magical place! Our New Website is awesome, with virtual tours, online shopping. We offer promotional products, t-shirts, mugs, etc. We receive huge donations to maintain our Art Gardens, Advertising, and business association. We receive donations, sponsorship and member dues from people who admire and appreciate all we do. We have the most wonderful outdoor patios; the concrete sidewalks have been artistically stained, and patterned, its a wonderful new look. Its very cool, we were able to build an information booth outside at the entrance, there are two lanes, traffic moves easily and safely through the whole place. Dear Creator its so wonderful working with so many wonderful people- we also have started a street artist contest and the teens in the area have come together and there has been an end to graffiti and crime for miles around, Metro is shocked and wants to implement our plan in other areas. Things have changed for the better because of this vision, this hope, this spark of light, it only takes one candle to light a dark room, and so we are ablaze with light, love and Harmony! Thank you Creator for our blessings and we are grateful to have a charity named after us, and we give abundantly for the good of all!!!

Namaste-Many blessings of light & love to all, Thank You!  
Paula Sadler-President & Founder
