WILDWOOD DESIGN SERIES

VINTAGE AESTHETIC + CUSTOMIZABLE COLOR + HIGH PERFORMANCE

The Wildwood Design Series fuses timeless echoes of nature with redefined luxury and comfort underfoot. Rooted in scenes of the great Northwest, Wildwood carpets invite well-traveled guests to retreat and soak in hues inspired by stone, soil, sand, bark, and clay — nature's timeless palette reimagined for restful spaces.

Handcrafted textures and mixed cut-and-loop construction (pile ht. 12.5mm) echo the feel of an antique Oushak with an organic, modern sensibility. Fields of rich, heathered color, accented with soft off-whites, create a tranquil "white noise" that soothes and disguises everyday movement.

From moodboard to made-to-order, Wildwood makes custom carpet design effortless — offering a curated selection of restylable biophilic patterns, resilient performance fibers like solution-dyed ECONYL® regenerated nylon, and the soft rustic charm of undyed mothproofed wool. An inspired canvas for hospitality and home.

AMERICAN MAKERS

Delos manufactures rugs in the US by applying robotic technology for consistency, precision, and speed with approximately 85% of the work hand-finished by local skilled craftspeople.

Delos' tufting technology frees interior designers from pattern repeats. A Delos designer can offer suggestions for yarn and construction options when requested for each project. Since Delos shears by hand, pile heights and edge finishes can be specified, including a 45% beveled accessible edge for higher traffic scenarios.

INSTALLATION

Wildwood's vintage aesthetic is elevated by indo striae yarn spun from European wool, with hand-blended shades of gray that create a timeless heathered effect. This refined texture enhances the design while minimizing the visibility of foot traffic and vacuum marks.

OUR ECO STORY

Delos is committed to caring for the planet and puts the same passion into managing resources as constructing rugs and carpets. Delos tufts with eco-friendly fibers made from materials that enhance the quality and beauty of Delos rugs while respecting the earth. It's a win-win.

Wool is sustainable, biodegradable, and healthy. An individual sheep renders more than 30kg of CO2 in its wool in a lifetime. Worldwide, wool renders three million tons of CO2 each year. Wool fibers dye beautifully, and rugs are durable and static free.

All-Natural Silk, a durable luxury filament occurring in nature, is inherently sustainable, natural, and biodegradable.

ECONYL® Regenerated Nylon is made from fishing nets, spent carpets and other nylon waste that has been collected around the world.

12 Interchangeable Colorways

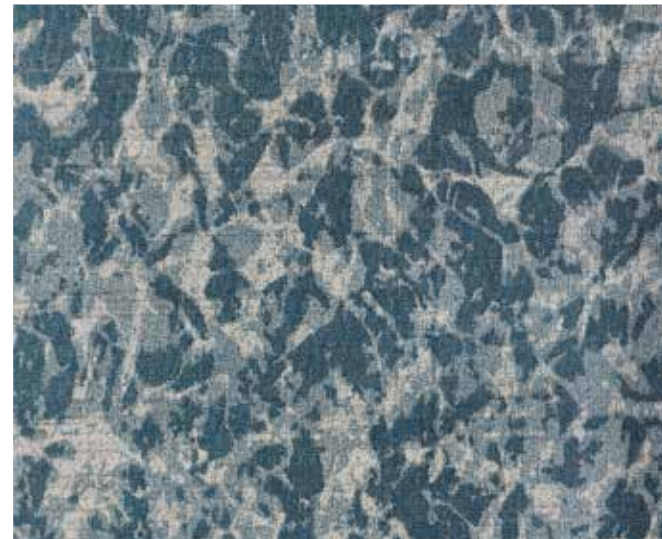

These curated color families blend an undyed, mothproofed indo striae (IS) wool yarn with three solution dyed ECONYL® nylon (EN) yarns in medium, dark, and darker shades. Customers may select from twelve colorways or create a custom mix by selecting from the 144-color pom folder.

MindClick rates the environmental health performance of manufacturers and their products. The resulting product intelligence drives transparency and innovation to meet local demand for healthier products and environments.

The Delos Patina Construction Achieves the Ideal Balance of Hand-crafted Charm and High Performance

The Patina Construction

The *Wildwood Design Series* patina construction is MindClick rated and comes to life through an artful interplay of 35% indo striae slubbed wool loop fibers (mothproofed) with 65% ECONYL® nylon offering both durability and alluring softness. The pile height is 12.5 mm. Additionally, the patina construction resists visible vacuum and foot marks, ensuring lasting beauty.

Delos offers European cut, fused, self hemmed, serged, and bound edging. Visit TheDelosCompany.com for visual examples.

Design Without Compromise

Delos project managers provide pricing, delivery details, and testing documents tailored to each order's quantity, size, and specifications.

Custom projects are warmly welcomed, with Delos designers available to collaborate on creative ideas, styling, and American tufting best practices—providing as much or as little support as desired.

Design Is in the Details

For customers seeking a barrier to aid cleanup and airflow, Delos offers reversible rug pads, trimmed 1" shorter and warrantied for radiant panel heat. Alternatively, Delos can attach rug pads upon request.

For slippage control, Delos latex backing meets coefficient of friction testing standards at 0.73 (dry) and 0.70 (wet), exceeding the > 0.60 requirement commonly specified for level walking surfaces.

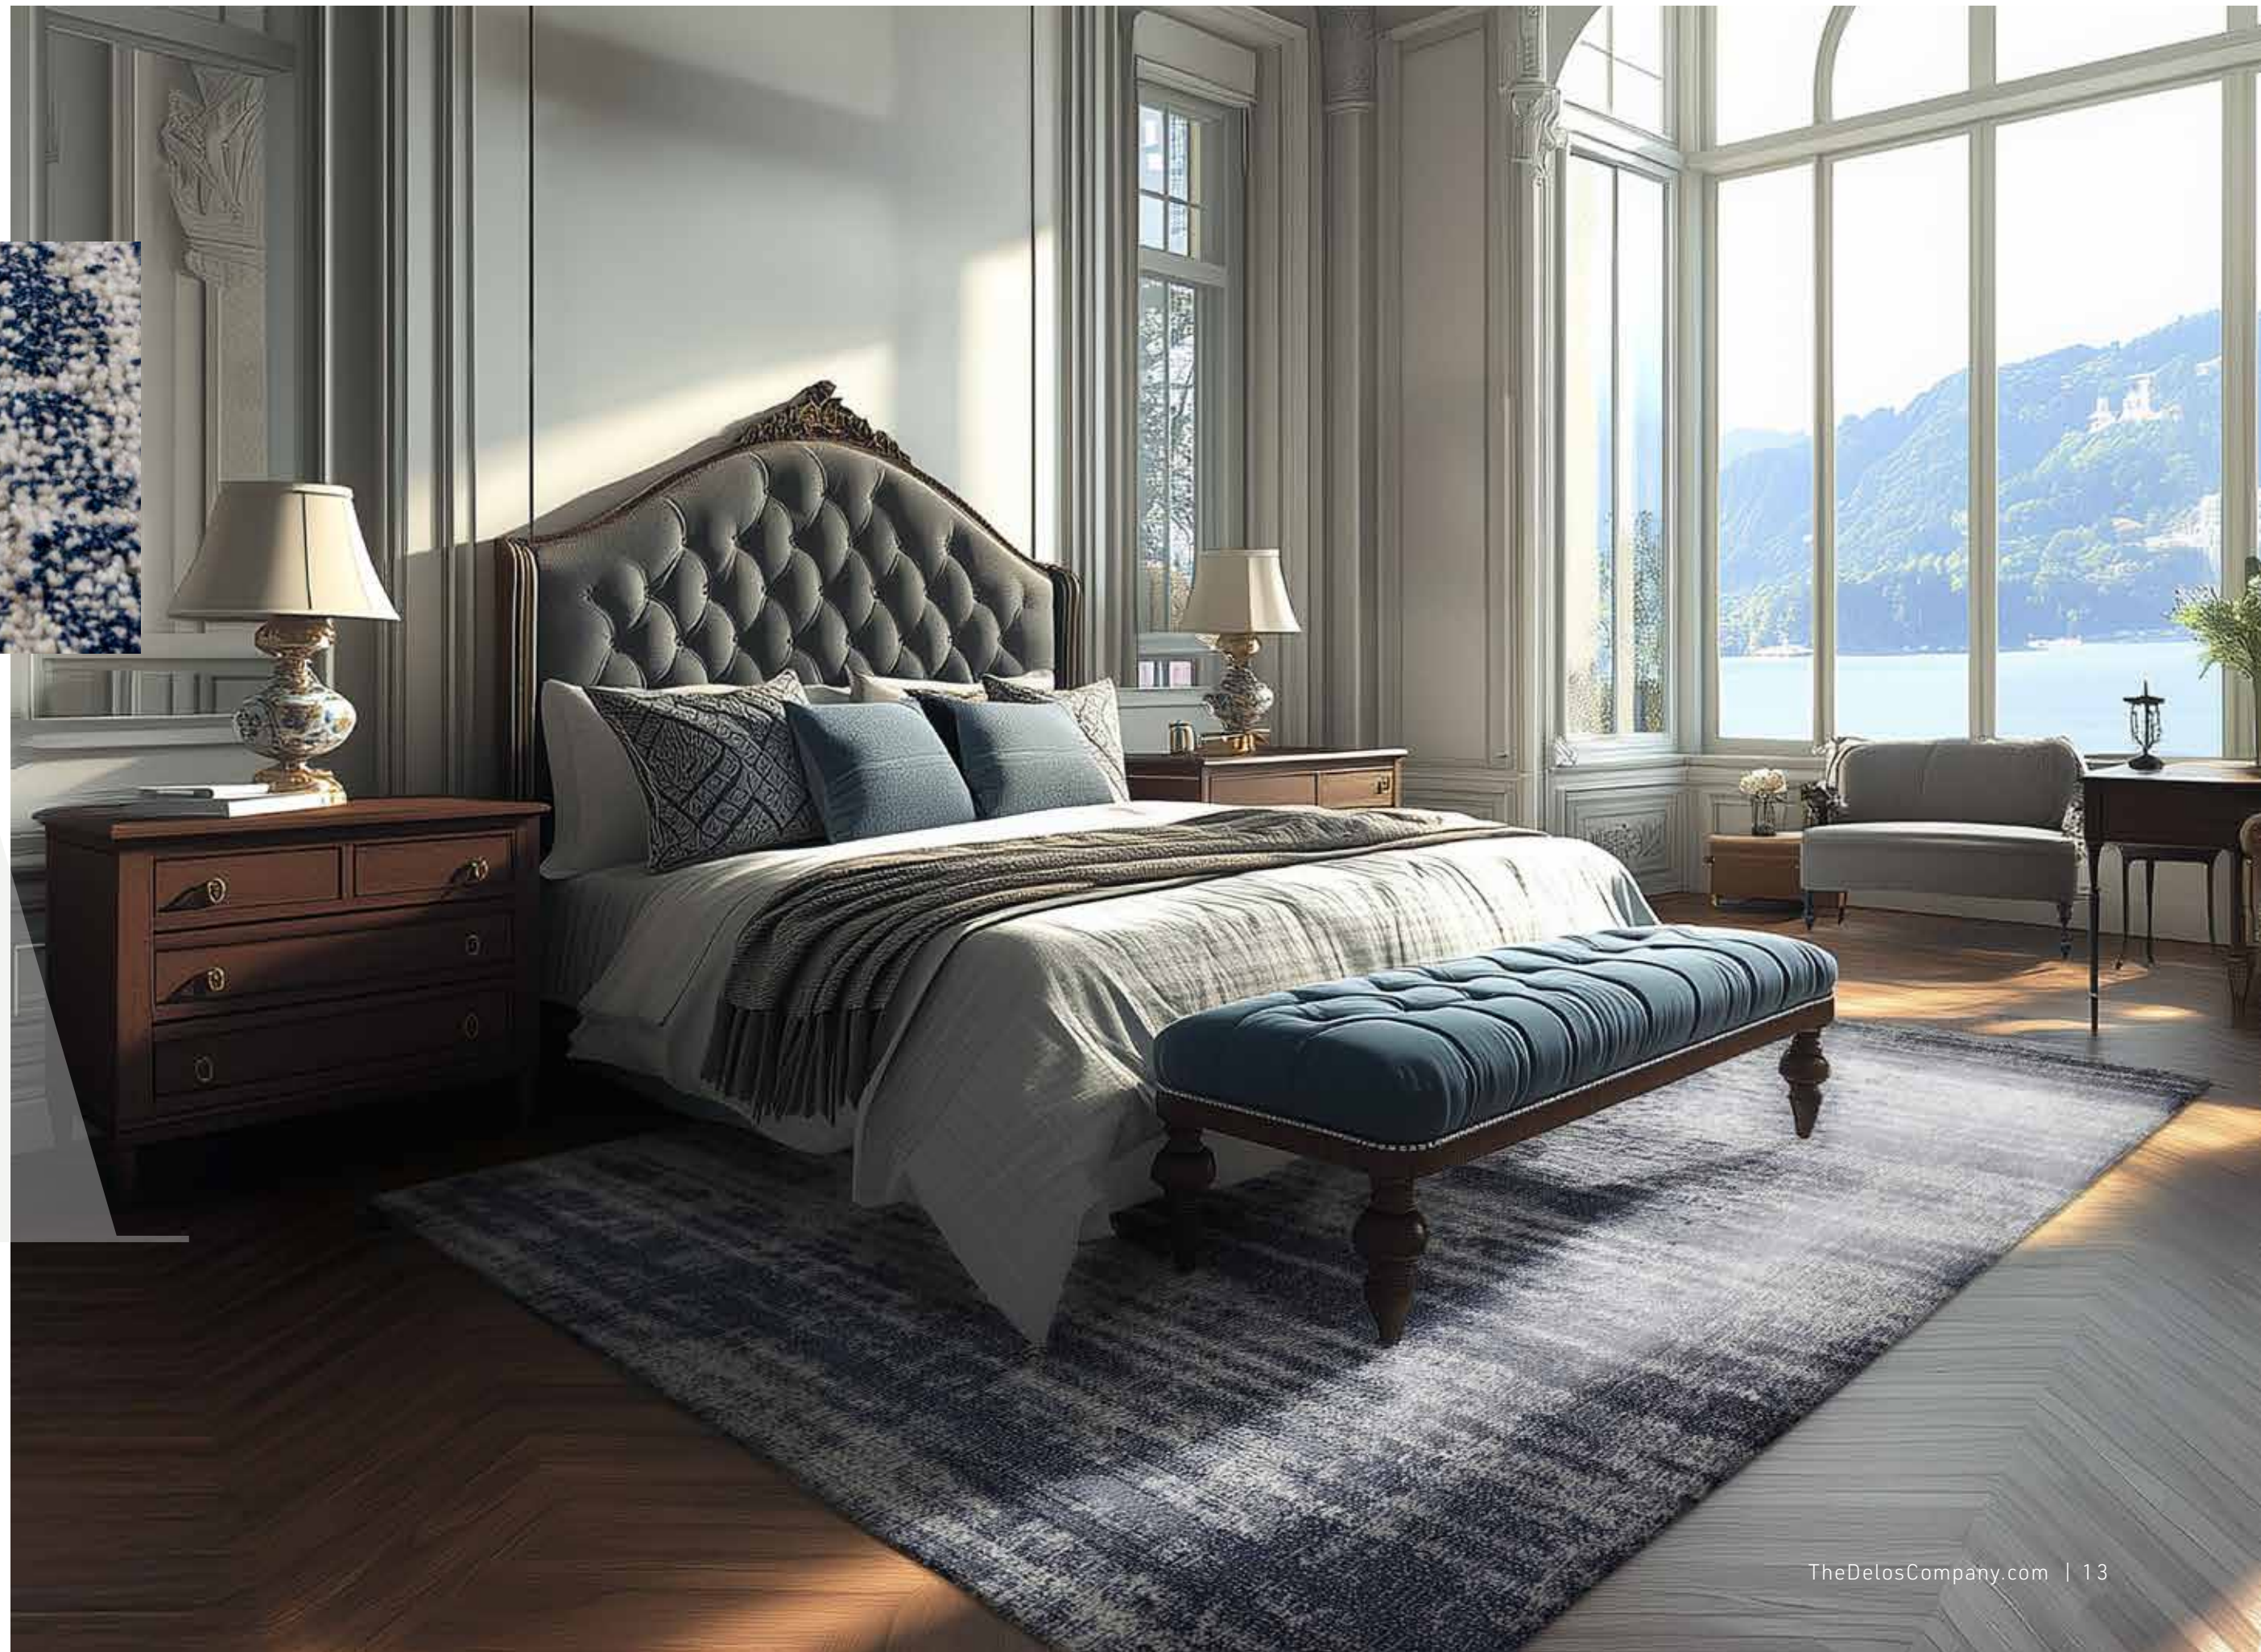

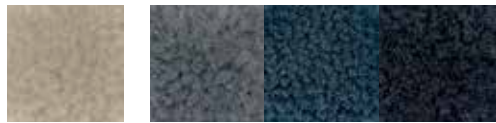

Ascent

COLOR BLUE SKY

Inspired by the grandeur of mountains, the soft sweep of clouds, and the boundless sky, *Ascent* captures the awe of encountering something vast and uncontainable. This design evokes elevation, quiet reflection, and inspiration, inviting a sense of looking upward toward the infinite.

Bowman

COLOR OCEAN

Named after Bowman Bay, this design reflects river rocks shaped by time, shoreline pebbles, and light dancing on a riverbed. It embodies water's quiet power – strong enough to shape stone, yet soothing to the soul – inviting a sense of peace and connection to nature's flow.

Eden

COLOR VERDANT

Eden captures the lush beauty of the forest understory – cool, shaded, and alive with movement. With patterns reminiscent of ferns and the soft rustle of leaves, *Eden* celebrates nature's hidden layers and pays tribute to the delicate balance where rest and renewal can coexist.

Lodge

COLOR EMBER

Lodge showcases the crisp lines and geometric elegance of 1960s Northwest style and mid-century modern architecture. It honors an era where modernism embraced nature, seamlessly blending organic textures and materials with bold, structured forms. With its lightly distressed pattern that nods to the passage of time, *Lodge* brings a unique edge to spaces grand and small.

Meadow

COLOR AUBERGINE

Meadow portrays the beauty of wildflower fields, revealed in moments of exploration and discovery. Like a hidden clearing along a nature walk, its design highlights the unexpected pleasure that is uncovered when venturing into new landscapes. *Meadow* celebrates the joy of wandering and the sense of arrival at a lush, gratifying space.

Trillium

COLOR CABERNET

Trillium honors the delicate first blooms of spring, signaling the end of winter and the promise of warmer days ahead. Its design, featuring a field of Trillium flowers, symbolizes renewal and the quiet strength of nature's resurgence. For many, these blossoms represent fresh starts and the excitement of new beginnings.
