MISSION

The primary goal of North Star Academy, a Chartered Public School, is to build on the principles of classical, Socratic education. From astrophysics to music, or from poetry to robotics, our teaching will illuminate the common principles that connects all subject matters, such as symmetry, dynamics, and potential. North Star Academy aims to establish research based learning with an emphasis on deriving lessons from original sources. Understanding the characteristics of historic individuals will be emphasized and explored in the context of their contributions to Western Civilization. Utilizing a well rounded curriculum, students will master their own abilities, knowledge, and confidence, setting them on a path to becoming leaders and contributors to New Hampshire's innovation and growth. This developmental path will provide the students a moral and intellectual impetus to increase their responsibility for their life and the world around them.

VISION

To provide each student the crucial intellectual and emotional development that is necessary to lead in the modern world. North Star Academy seeks to equip students with a scientific method to navigate and address the vast challenges in life. Additionally, students will understand and appreciate American history, promote our country's founding principles, and engage in civil service. Finally, each student will achieve their highest level of intellectual, artistic expression.
