## MyAphasia

### MyAphasia

MyAphasia is an Augmentative and Alternative Communication (AAC) app designed to help people with aphasia and other speech or language challenges communicate more easily and confidently. The app allows users to speak common phrases with a single tap, supporting independence and dignity in everyday communication.

### Key Features

- Category-based phrases (Health, Feelings, Personal, Today)
- It is capable of talking in English, French, German and Spanish and the User Interface automatically switches to the language. Add, edit, and delete categories and sentences
- Custom sentences up to 100 words
- Multiple natural text-to-speech voices
- Optimized for iPhone and iPad

### Accessibility Statement

MyAphasia is designed with accessibility at its core. It supports people with aphasia, stroke survivors, and individuals with speech or language difficulties through a clean, simple, and reliable interface.

### Accessibility Features

- Large, easy-to-tap buttons
- Clean layouts to reduce cognitive load
- Simple navigation structure
- Natural text-to-speech voices
- Compatible with iOS accessibility features
- MyAphasia promotes independence, confidence, and dignity in communication.
