Dr. Michael Smith DC, DACRB

Affordable chiropractic Care

**Physical Therapy performed by the
Chiropractic Rehabilitation Physician**

Experience the Chiropractic Difference

Rehab, Relief, Recovery

Chiropractic treatment plan success.

IMPORTANCE OF YOUR TREATMENT PLAN

Your treatment at our office begins with a treatment plan of health care procedures necessary to address your particular needs. Commonly, a number of visits per week are recommended for you along with some type of self-administered care/exercises at home.

During your care, we monitor and measure your progress through examination, response to care, progress of exercises, and the office forms you complete.

Therefore, it is important for you to perform all recommended home care and attend your all of your regularly scheduled visits to fully benefit from your care at our office. We appreciate your compliance with our treatment recommendations because it helps us to better serve you and achieve the best results.
