Compound Management Guidelines

- ❖ Compound naming:
 - Please avoid generic names such as "Compound 1", "Compound 2", "Compound A", etc.
- ❖ Customer will be notified if:
 - The package is broken
 - Compounds arrive thawed when it appears there was refrigerant present in the shipment
 - Compound ID does not match the compound assay form

Compound Storage

- ❖ As a standard practice, EtB will store client's compounds for 6 months from receipt. Please notify us if you need to store them for longer.
- ❖ Default compound storage condition after the package arrives at RBC:
 - For powder compounds that arrive with no refrigerant: Room Temp
 - For powder compounds that arrive with refrigerant: -80°C
 - For liquid compounds that arrive with no refrigerant: -80°C
 - For liquid compounds that arrive with refrigerant: -80°C

Solubility

- ❖ If compounds are not soluble at 10 mM, compounds may be heated to dissolve. If you do not want compounds heated, please notify us in advance.
- ❖ If you are aware of compound solubility issues at 10 mM, please advise EtB of the solubility range of the compounds.

Special storage condition, please make a note here:

-4°C:

-20°C:

Light sensitive:

Additional note:
