THIS BROCHURE DESCRIBES THE MODEL
133210 AND THE MODEL **134815** SYSTEMS.

**Notice to Consumer: Operational,
maintenance and replacement requirements
are essential for this water treatment device
to perform as sold.**

Treatment Method: Chlorine Disinfection,
Carbon Filter and Softener.

Treatment Purpose: Domestic and light
commercial potable water only. Disinfection to
kill bacteria, removal of hydrogen sulfide, iron,
iron bacteria, manganese, calcium hardness.
The result is clean water.

The system includes these components

Flow switch, to operate the chlorine pump by
water usage.

Chlorine solution pump.

Chlorine solution tank, 35 gallon.

Retention tank, 120 gallon fiberglass, Vacuum
relief valve included.

**Filter, automatic backwash carbon filter with
NSF approved granular activated carbon.**

Softener, automatic backwash with high
capacity ion-exchange resin. The softener may
contain filter carbon in addition to the resin,
depending on local water conditions. Separate
salt tank.

Controllers The softener and filter controllers
will either be Pentair Fleck 5600 or WaterShield
One, depending on the installation conditions.

Model 133210 is the medium size system. The
softener is 32,000 grain capacity. The filter
contains 1.0 cubic feet of carbon. Approximate
flow rate is 8 gallons per minute

Model 134815 is the large size system. The
softener is 48,000 grain capacity. The filter
contains 1.5 cubic feet of carbon. Approximate
flow rate is 8 gallons per minute. Suitable for
larger residential and light commercial
applications.

Maintenance

The end user is responsible for regular
maintenance for this system to operate as
intended. We give you all of the available
owner's manuals, maintenance information and
training for you to successfully care for your
water treatment system. Our website has a full
selection of helpful manuals and videos to help
you succeed.

We also offer full maintenance services. Call us,
visit our store or request service through our
website.

Installation Service

Installation service is available in most of our
usual service area. We obey the "Call Before
You Dig" Law. We can give an accurate quote
only after we inspect the job site. We provide a
full tank of chlorine solution and salt with the
installation. We start up the system. We
guaranty the installation work for 90 days.
Please contact the store for details.

Permit

A plumbing permit may be required by your local
municipality. Discount Water Supply is licensed
and insured and fully qualified to obtain a permit
and pass an inspection.
