

Simple Setup Guide

Kraken Step 10 | MetaMask Step 11 | Uniswap Step 12

Use only official apps and websites. Save passwords and recovery phrases in a secure place.

Step 10 - Kraken Account Setup

- Go to the official Kraken website and click Sign Up.
- Enter your email, create a strong password, and choose your country.
- Open the email Kraken sends you and confirm your account.
- Complete identity verification if Kraken asks for it.
- Save your login information somewhere safe.

Tip: Double-check that you are on the real Kraken site before signing in.

Step 11 - MetaMask Wallet Setup

- Install the official MetaMask app or browser extension.
- Open MetaMask and choose Create a New Wallet.
- Create a strong password.
- Write down your Secret Recovery Phrase and keep it offline in a safe place.
- Confirm the phrase when MetaMask asks, then finish setup.

Important: Never share your Secret Recovery Phrase with anyone.

Step 12 - Uniswap Setup

- Open the official Uniswap app or wallet.
- Choose Create a Wallet, or connect the wallet you already made in MetaMask.
- If creating a wallet, make your password or enable Face ID/biometrics if prompted.
- If connecting MetaMask, choose Connect Wallet and approve the connection.
- Once connected, you can view tokens, swap, or use Uniswap features.

Easy option: Many people connect MetaMask to Uniswap instead of creating a second wallet.

Quick Safety Reminders

- Use only official websites and apps.
- Never give anyone your recovery phrase or one-time security codes.
- Take your time before sending any crypto to an address.
- Keep screenshots, passwords, and backup phrases organized and secure.
