<http://olddogsintraining.com>

Born in Bristol, England  
American Citizen

**Education:**

- 1967 Bachelor of Veterinary Science (B.V.Sc.), University of Bristol, England
- 1975 Ph.D. (Veterinary Pathology), University of Edinburgh, Scotland
- 1979 Diplomate A.C.V.P. (American College of Veterinary Pathologists),  
Veterinary Pathology
- 1986 M.R.C.Path. (Member of the Royal College of Pathologists)
- 1995 F.R.C.Path (Fellow of the Royal College of Pathologists – stopped paying  
dues about 20 years ago!)
- 2011 Entrepreneurship in the school of Internet Business Life.

**Professional Experience:**

- 2011 - Entrepreneur. Owner of Old Dogs in Training LLC, consulting on health  
issues and miscellaneous scientific questions, upon request.
- 2002 -2011 Advisor on New Molecular Technologies to DSE World Wide, Aventis and  
Sanofi-Aventis, Bridgewater, NJ
- 2000 - 2002 Head, Toxicogenomics-Mechanisms, GSK, RTP.
- 1997-2002 Scientist, GlaxoWellcome, TOX-T1178, 5 Moore Drive, Research Triangle  
Park, NC 27709
- 1981-97 Senior Scientist, Department of Experimental Pathology and Toxicology,  
CIIT, Research Triangle Park, North Carolina, U.S.A.  
  
Research. Training of post-doctoral fellows and graduate students.  
Facilitating work of visiting scientists. Developed successful and ongoing  
research programs in nasal toxicology and neurotoxicology.
- 1980-81 Associate Head of the Section of Toxicology and Experimental  
Carcinogenesis, Battelle, Geneva, Switzerland.

CONFIDENTIAL

Head of skin painting program (SENCAR mice), general pathology duties, developed an interest in the applications of computer science.

1978-80 Pathologist, Pathology Services Project, National Center for Toxicological Research, Jefferson, Arkansas, U.S.A.  
Assistant Professor, Department of Pathology, University of Arkansas Medical School, Little Rock, Arkansas.

Learned general rodent pathology, completed pathology boards, and developed an interest in ovarian carcinogenesis.

1975-78 Research Scientist, Battelle, Geneva, Switzerland.

Respiratory tract pathology, scanning electron microscopy, whole body autoradiography, metabolism and pharmacokinetics, studies of human platelet function (working language was french)

1970-75 Veterinary Research Officer and Senior Veterinary Research Officer, Moredun Animal Diseases Research Institute, Edinburgh, Scotland.

Responsible for neuropathology diagnostic service. Provided pathology support to other researchers and developed multiple research programs, including studies of copper and thiamine antimetabolite toxicity.

1967-70 General veterinary practice (Farm and companion animals) in England.

**Other Appointments:**

1996- Member of Editorial Board of Fundamental and Applied Toxicology.  
Chairman of Organizing Committee for 1997 Plenary Session on Respiratory System Pathology of the ACVP.

1994- Member of nomenclature committee of the Society of Toxicologic Pathologists - proliferative lesions of the C.N.S.

1993- Adjunct Associate Professor, North Carolina State University

Currently mentoring an excellent student (Dr. Joelle Ibanes) through her doctoral program in immunology. Lecturing responsibilities in North Carolina State University, Toxicologic Pathology course for the past several years.

1993- Member of A.C.V.P. Externship Committee and Harold Casey Committee.

## CONFIDENTIAL

- 1991- Adjunct Associate Professor, Duke University Medical School, Toxicology Program.
- 1991- Member of the Editorial Board of Food and Chemical Toxicology.
- 1987-90 CIIT Postdoctoral Coordinator.
- Worked with young scientists to find an appropriate match with senior staff and research area. Organized interview process, handled circulation of resumes, acted as a facilitator and aided in selection of post-doctoral fellows.
- 1984- Adjunct Assistant Professor, Department of Pathology, University of North Carolina at Chapel Hill.
- 1983- Frequent consultant to industry and government. Principally for my expertise on upper respiratory tract toxicology and carcinogenesis.
- 1979- Participated in multiple toxicology studies, including slide reading, report generation, quality assurance, and preparation of manuscripts.

### **Professional Societies:**

Royal College of Veterinary Surgeons  
British Neuropathological Society  
American College of Veterinary Pathologists  
Society of Toxicologic Pathologists  
Société Française des Anato-Pathologistes Toxicologues  
Royal College of Pathologists  
North Carolina Society for Neuroscience  
North Carolina Society of Toxicology

### **Advisory Work And Collaboration With Federal Laboratories:**

- From 1981 Reviewed multiple articles for "Toxicology and Applied Pharmacology", "Fundamental and Applied Toxicology", "Toxicology", "The Journal of the National Cancer Institute", "Environmental Health Perspectives", "American Review of Respiratory Disease", "American Journal of Pathology", and other journals.
- From 1982 Consultant to the National Toxicology Program (N.I.E.H.S.) for Pathology Working Groups and Contract Proposal Reviews. Collaborative work and invited speaker on ovarian and brain tumors of mice. Regular reviewer of articles for N.T.P. Pathology Branch. Co-organizer of N.T.P. meeting on Toxicity of the Upper Airways (1988).

CONFIDENTIAL

From 1985 Member of faculty of the International Life Science Institute (I.L.S.I.) Seminar Series on Reproductive Pathology (Ovarian Neoplasia) and author on associated monograph.

Invited speaker at I.L.S.I. Inter-disciplinary Discussion Group Meeting at Chapel Hill, 1986. Invited author for I.L.S.I. monograph on pathology of the Nervous System.

Faculty of the I.L.S.I. Seminar Series on the Respiratory System.

**Teaching Experience:**

Society of Toxicology continuing education courses:

Respiratory system (1989)

Olfactory system (1993)

I.L.S.I. faculty for toxicology pathology of organ systems

Reproductive system (1987)

Respiratory system (1993)

N.C.S.U.-C.V.M. Rodent Toxicologic Pathology Course

Nervous system (1992)

Respiratory system (1992-96)

**Presentations:**

Multiple. Usually about 10 per year. Recently included:

- Society of Toxicology, Continuing education, "An Overview of Olfactory Toxicity".
- British Society of Toxicology, Symposium on Sensory Systems, "Olfactory Toxicity".
- British Society of Toxicologic Pathologists, Symposium on Metabolic Basis of Toxic Responses, "Nasal Metabolism and Regional Responses to Xenobiotics in the Nose".
- CIIT Symposium on Nasal Toxicity, "Nasal Dosimetry, Regional Responses, and the Role of the Toxicologic Pathologist".

**Awards:**

1992 Research Paper of the Year. Society of Toxicology, Inhalation Specialty Section, Co-Author. Fundam. Appl. Toxicol., 17, 409-428.

### **Grants And Contracts:**

Negotiated extensive research support for multiple programs at Battelle-Geneva. My time at CIIT has been generally so well supported that seeking grant money was unnecessary. However, in spite of this fact I obtained a number of grants to accelerate progress towards my major research goals. I also submitted one grant application to N.I.H from CIIT. The proposal was rejected, but I received approval as a qualified investigator. I believe that I could successfully pursue NIH support in an academic environment. I am currently a consultant on a large NIH grant funding the laboratory of Dr. Peter Scherer.

While at CIIT I obtained or contributed to the obtaining of the following extra mural funding:

1. \$250K Proctor & Gamble, Research on Glutaraldehyde Toxicity (1989-92). (Principal Investigator)
2. \$35K Proctor & Gamble, Post-graduate support for Dr. Joelle Ibanes, studies of a Rat Adapted Influenza Virus, (1994-). (Principal Investigator)
3. \$260K/annum. EPA co-operative agreement, studies of nasal airflow in rhesus monkeys and humans (1993-96). This grant supported a research program I developed in 1985, with Julia Kimbell (mathematician) as Principal Investigator. This grant provided about 20% of my salary for 3 years (Co-investigator).
4. \$50K. Research with Dr. Jack Harkema, I.T.R.I., for Health Effects Institute, studies of ozone toxicity and responses of nasal mucociliary apparatus (1992-1994). (Co-investigator)
5. \$357K. Health Effects Institute. Studies of nasal toxicity in rodents exposed to Mexico City Urban Air. (Principal Investigator).

### **Publications:**
