

# U.S. Should Be Prudent under Present Acute Situation: Spokesman for KPA Strategic Force

Pyongyang, August 9 (KCNA) -- A spokesman for the Strategic Force of the Korean People's Army (KPA) released the following statement on August 8:

Recently, the U.S. test-fired ICBM Minuteman-3 at its Vandenberg Air Force Base in California State targeting the DPRK, the fourth one this year, openly staged an actual nuclear strike drill targeting the strategic objects of the DPRK by mobilizing its nuclear strategic bombers formation stationed at its Anderson Air Force Base on Guam in the Pacific. It is driving the regional situation to an extreme pitch by bringing various kinds of nuclear strategic hardware before the very eyes of the DPRK. The Strategic Force of the KPA has taken special note of such maneuvers.

Such military maneuvers of the U.S. may provoke a dangerous conflict under the present extremely acute situation prevailing on the Korean peninsula.

Typically, the nuclear strategic bombers from Guam frequent the sky above south Korea to openly stage actual war drills and muscle-flexing in a bid to strike the strategic bases of the DPRK. This grave situation requires the KPA to closely watch Guam, the outpost and beachhead for invading the DPRK, and necessarily take practical actions of significance to neutralize it.

In the morning of August 8 the air pirates of Guam again appeared in the sky above south Korea to stage a mad-cap drill simulating an actual war.

Supreme Commander of the revolutionary forces of the DPRK **Kim Jong Un**, estimating the nature of the military action taken by the U.S. forces in the Asia-Pacific region, once recommended examination of a powerful and effective action plan for containing the U.S. imperialists' aggression hardware as the U.S. forces are resorting to inappropriate and reckless military actions in the sensitive area, while going on the rampage in the waters off the Korean peninsula and the Pacific waters.

The KPA Strategic Force is now carefully examining the operational plan for making an enveloping fire at the areas around Guam with medium-to-long-range strategic ballistic rocket Hwasong-12 in order to contain the U.S. major military bases on Guam including the Anderson Air Force Base in which the U.S. strategic bombers, which get on the nerves of the DPRK and threaten and blackmail it through their frequent visits to the sky above south Korea, are stationed and to send a serious warning signal to the U.S.

The plan is to be soon reported to the Supreme Command soon after going through full examination and completion and will be put into practice in a multi-concurrent and consecutive way any moment once **Kim Jong Un**, supreme commander of the nuclear force of the DPRK, makes a decision.

The execution of this plan will offer an occasion for the Yankees to be the first to experience the might of the strategic weapons of the DPRK closest.

Explicitly speaking again, the strategic weapons which the DPRK manufactured at the cost of blood and sweat, risking everything, are not a bargaining thing for getting acknowledgement

from others and for bartering for anything, but they serve as substantial military means for resolutely countering the U.S. political and economic pressure and military threat as what has been observed now.

Will only the U.S. have option called "preventive war" as is claimed by it?

It is a daydream for the U.S. to think that its mainland is an invulnerable Heavenly kingdom.

The U.S. should clearly face up to the fact that the ballistic rockets of the Strategic Force of the KPA are now on constant standby, facing the Pacific Ocean and pay deep attention to their azimuth angle for launch.

It should make a proper option so as not to regret today in the future.

It should immediately stop its reckless military provocation against the state of the DPRK so that the latter would not be forced to make an unavoidable military choice.
