

In the Face of Challenge and Difficulties

A serious public health crisis persists in the Democratic People's Republic of Korea, but not a shadow of disappointment and despair can be found. To defend the lives and safety of the people, officials of the ruling Workers' Party of Korea and government organs and medics of the Korean People's Army are going among them, vehicles carrying foodstuffs and medicines are running to every nook and cranny of the country, medical personnel are visiting the people regularly, and neighbourhood unit heads and itinerant service teams are calling on the residents under their charge with essential consumer goods. All the people are helping and caring for others and overcoming the challenge and difficulties on the strength of virtue and human feeling.

Fresh Vegetables Are Supplied to Families

In line with the switchover of the national epidemic prevention work into the top-level emergency anti-epidemic system, the city of Chongjin in North Hamgyong Province in a northern part of the Democratic People's Republic of Korea is supplying in time fresh vegetables from the Jungphyong Vegetable Greenhouse Farm so that the local people would not feel inconvenience in their dietary life.
