

## A Precious Treasure of Priceless Worth

We still can never forget the broadly smiling image of respected Comrade **Kim Jong Un** who was so glad to see the children of ordinary working people receiving medical treatment in the palatial hospital when he visited Okryu Children's Hospital on March 21, 2014.

Okryu Children's Hospital is a modern and comprehensive children's hospital that respected Comrade **Kim Jong Un** personally selected its site to be built at a place opposite to Pyongyang Maternity Hospital. He also reviewed the miniature of its design for dozens of times and saw to it that it was completed at world standard.

On July 16, 2013, a pouring wet day, respected Comrade **Kim Jong Un** visited the insecure construction site of the children's hospital when the frame construction had been just finished. He ensured that the hospital is equipped with a complete set of modern, cutting-edge medical equipment and all sorts of fixtures, ambulances and cars for management and operation, and took a solicitous step to build even a helicopter landing site, saying that no expense should be spared for the children.

On October 5, 2013, he again visited the children's hospital just before its completion and personally named it as "Okryu Children's Hospital", saying that the word "Okryu" with the meaning of the flow of water so clean and fresh like bead is a good word symbolizing Pyongyang together with "Ryugyong".

A few days later, the opening ceremony of Okryu Children's Hospital was held with splendor on the occasion of the founding anniversary of the Workers' Party of Korea.

After having looked around Okryu Children's Hospital which was built in a modern style to capture juvenile fancy, foreigners from various countries opened their hearts as follows; this reminds us of a palace rather than a mere hospital, it is impressive to see that the juvenile in-patients can continue their study in the education rooms built in the hospital, we can hardly believe that such excellent equipment are bought at high prices to give free medical services to the children and we are so envious of the children who are living in such a wonderful country.

Indeed, respected Comrade **Kim Jong Un** values the children as a precious treasure of priceless worth, and gives them prominence as all of the hope and future. As we uphold him in high esteem as great father, Korean revolution will advance in victory forever by dint of the strength of love for posterity and future.
