

A Factory More Important than Nuclear Weapons Plant

From KCNA (May 16)

Our country is further strengthening national nuclear forces both in quality and quantity against ever-increasing politico-military provocations of hostile forces aimed at infringing upon our sovereignty and dignity. Such being the situation, people wouldn't easily believe if there is a factory in our Republic which is more important than the one that makes nuclear weapons.

That is the Mindulle (dandelion) Notebook Factory which was built by the noble love for future cherished by respected Comrade **Kim Jong Un**.

There is a touching story telling how this factory became more important than the one that makes nuclear weapons, one of the indices determining the strategic position of a country.

Respected Comrade **Kim Jong Un** personally initiated the construction of a notebook factory for our children and schoolchildren and solved all the problems arising in its construction. Then, he visited the newly-built Mindulle Notebook Factory on April 18, 2016.

He acquainted in detail with the notebook production while looking around sample display room, room dedicated to the history of the factory, printing workshop and bookbinding workshop. He expressed satisfaction all along as he was very pleased over the fact that our children and schoolchildren can be provided with high-quality notebooks.

Saying that we have built a modern notebook factory at the time when the sanctions of enemies reached to extremes, he continued that it stands as a clear testimony to our Party's policy on education of future generations. He proudly said that the Mindulle Notebook Factory is the one that implemented the behests of President **Kim Il Sung** and Chairman **Kim Jong Il**, our Party pays much attention to this factory, and that this factory is his notebook factory.

Respected Comrade **Kim Jong Un** solved all the problems arising in the production of notebooks such as expanding the production capacity, supplying enough raw materials and resources for production and improving the level of technique and skills of employees. Saying that the notebooks produced at this factory brings the future of our country, respected Comrade **Kim Jong Un** said that the future thriving Korea belongs to our children who would grow up into the pillars of the country, using these notebooks. Then he warmly said that the Mindulle Notebook Factory, in this sense, can be regarded as a factory more important than the nuclear weapons plant.

Before leaving the factory, respected Comrade **Kim Jong Un** earnestly said that officials and employees of the factory should do their best for the production of notebooks with the same hearts of mothers who bind notebooks for their lovely children.

“A factory more important than nuclear weapons plant”, “with the hearts of mothers who bind notebooks for their lovely children”. These words encapsulate the noble view on posterity and future cherished by respected Comrade **Kim Jong Un** who regards the future generations as the most precious treasure of the country, and as the entirety of hope and future.

Thanks to the fraternal love of respected Comrade **Kim Jong Un** who desires to provide our children and schoolchildren with the best conditions and environment for education in the world, the Mindulle Notebook Factory is now continuing to produce high-quality notebooks even in the throes of the worst ever difficulties in history.
