

Counteraction by the DPRK

Recently, the Democratic People's Republic of Korea was compelled to change course and conduct a launch drill of ICBM *Hwasongpho-18*. This was a tougher countermeasure against the hostile forces' gross provocations which more seriously threaten the security of the country and the region. It is a clear demonstration of what action the DPRK is ready to take rapidly and what it will choose to do, in case the United States makes a wrong decision regarding it.
