

DPRK Records Another Success

The confrontation attempts by the US and south Korea, which might bring a new chain of nuclear crises to the Korean peninsula and Northeast Asia, are approaching an intolerable critical point.

On July 12, the Democratic People's Republic of Korea conducted a test-fire of a new-type ICBM *Hwasongpho-18*, demonstrating that there will be a continuation of alarming events on the road of its endeavour to build up its national defence capabilities as long as the forces hostile to it increase their military threat and challenges.
