

New Flourishing Socialist Living Space in Pyongyang

The picture below is a new flourishing living space that has formed a characteristic architectural group in Pyongyang, the capital city of the Democratic People's Republic of Korea. On April 16, 2023, the inauguration ceremony of the 10 000 flats as the first stage in the Hwasong area, was held. Present at the ceremony were also the working people and their families who will live in this area.

The street decorated by dazzling illuminations with the firework display as the background in the nocturnal sky eloquently proves what kind of socialist ideals the country is now aspiring after.

Part of the 10 000 flats built as the first stage in the Hwasong area, which has been completed in a matter of one year after its start in February last year

Another 10 000 Flats Built in Pyongyang

On April 16 this year, Pyongyang, the capital city of the Democratic People's Republic of Korea, saw the inauguration ceremony of 10 000 flats built in its Hwasong area as the first stage of housing construction in this area. The project started on February 12 last year according to the Workers' Party of Korea's plan for building 50 000 flats in Pyongyang.

Covering an area of about 150 hectares, the modern residential quarters consist of super-high-rise and high-rise apartment houses of various styles, public buildings, neighbourhood-serving amenities and other facilities. The 10 000 flats represent another entity of great change born of the policy of the WPK which devotes its all to the people.
