

FOR IMMEDIATE RELEASE

MIFA at Clandestina: *Between Boundaries & Change*
December 6-7, 2024

Miami, FL – MIFA Residents at Feria Clandestina III Edition proudly presents *Between Boundaries & Change*, a thought-provoking group exhibition featuring six MIFA resident artists: Nidia Baquero, Isaac Bencid, Marco Caridad, Christopher Sherry, Silvana Soriano, and Adriana Zubikarai. This special two-day event will take place at **Feria Clandestina** on December 6 and 7, 2024.

This exhibition explores personal transformation through the interplay of space, time, and identity. Using collage, assemblage, and video, the artists examine confined spaces—both physical and emotional—where individuals often feel trapped or limited. These environments, rather than constraining, act as catalysts for growth and self-discovery, revealing the complexities of the human experience and the ongoing process of identity formation.

Featured Artists and Works:

- **Nidia Baquero:** *Rebirth* captures the poet/artist’s transformative journey and honors the support of those who have inspired her along the way.
- **Isaac Bencid:** Through rhythm, balance, and composition, Bencid’s intuitive pieces navigate the tensions of transformation and invite reflection on layered emotions and thoughts.
- **Marco Caridad:** *Hombres de Maíz, Barro o Madera* uses rolled and tied book pages to evoke the tension between tenderness and confinement, exploring themes of intimacy, identity, and transformation.
- **Christopher Sherry:** These collages assemble diverse elements to explore the intersection of boundaries, reflecting shared values despite differences in shapes, textures, and edges.
- **Silvana Soriano:** *Ipsis Litteris* examines how idiomatic expressions reflect cultural identity, creatively interpreting them through mixed media to explore cultural nuances and communication.

- **Adriana Zubikarai:** *Browsing Light* captures the artist's journey of change and awakening while adapting to life in Miami after two decades in New York City, reflecting the rhythm and energy of both environments.
