

California Proposition 65 Warning

Proposition 65 is a California law that applies to any products sold in California. The official name of Proposition 65 is the Safe Drinking Water and Toxic Enforcement Act of 1986. Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.

Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. This list, which must be updated at least once a year, has grown to include approximately 900 chemicals since it was first published in 1987.

A Proposition 65 warning means one of two things: (1) the business has evaluated the exposure and has concluded that it exceeds the "no significant risk level"; or (2) the business has chosen to provide a warning simply based on its knowledge about the presence of a listed chemical without attempting to evaluate the exposure.

Products sold by Best West Fasteners may contain these chemicals in a smaller amount than Proposition 65's concern, or not at all. We at Best West Fasteners have chosen to issue this warning on all of our products as an act of caution to our customers

**WARNING:**

This product can potentially expose you to chemicals including lead, nickel and chromium which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

Listed Chemicals Present or Potentially Present

Arsenic (inorganic arsenic compounds)	Lead and lead compounds
Arsenic (inorganic oxides)	Lead acetate
Benzene	Lead phosphate
Cadmium	Mercury and Mercury compounds
Cadmium and cadmium compounds	Michler's ketone
Chromium (hexavalent compounds)	Nickel (Metallic)
Coke oven emissions	Nickel compounds
Hydrogen cyanide (HCN) and cyanide salts (CN salts)	Silica, crystalline (airborne particles)
Lead	Urethane (ethyl carbamate)
