

At daffodil Preparatory School, our Science curriculum is designed to ignite curiosity, build critical thinking, and inspire a lifelong passion for discovery. Through hands-on experiments, investigations, and interactive activities, students delve into topics such as the human body, forces and motion, earth and space, living things and habitats, materials and their properties, and more. Our curriculum encourages active inquiry, collaborative learning, and real-world application, termly assessments that blend fun activities with meaningful evaluation, we ensure continuous progress tracking whilst building a love for scientific exploration and discovery at daffodil Preparatory School.

# Science

## AT DAFFODIL PREPARATORY

### Year 1

- Living things
- Properties of materials
- Seasons and weather
- Forces and motion
- Plants and growth

### Year 2

- Habitats and environments
- Materials and their uses
- Living things
- Light and shadow

### Year 3

- Rocks and soil
- Forces and magnets
- Light and sound
- Plants and growth
- Animals and their habitat

### Year 4

- States of matter
- Electricity and circuits
- Sound and hearing
- Digestive system
- Habitats

### Year 5

- Earth and space
- Magnets and friction
- Life cycles
- Rock detective
- Investigating matter

### Year 6

- Ecosystems
- Electricity and circuits
- Earth's resources
- Evolution and adaptation
- Light: reflection and refraction
