*Architects in >Philanthropy*

Engineered. Driven. Smart.

## MISSION

**mach73** is the catalyst for a distinctly new wave of strategic, accelerated, and high-impact philanthropy. We **engineer** the infrastructure of social change to move the needle on America's most critical needs.

## VISION 2034: PERFORMANCE GOALS

By 2034, **mach73** will have:

- **Re-architected** the operations of 500 Not-for-Profit organizations.
- **Optimized** the portfolios of 1,000 elite donors.
- **Accelerated** more than \$200 million in new, impact-grade donations.

## THE VALUES SIGNATURE

- **Integrity (The Foundation):** Adhering to the highest industry and professional standards.
- **Donor-Centric (The Fuel):** Placing the passions of the investor at the center of the engine.
- **Innovation (The Supercharger):** Fearlessly exploring untried methods for exponential outcomes.
- **Engineered Focus (The Roadmap):** Driving change through structural precision.

## WHY THE SECTOR IS IDLING

The American NFP sector is a **\$2.62 trillion engine** that is currently underperforming due to structural drag.

- **92% of NFPs** operate on less than \$1M/year, trapped in a cycle of "subsistence" rather than "significance."
- **30% of NFPs** fail within 10 years because they lack architectural integrity.
- **\$499.3 Billion** is given annually, but it remains largely transactional.

Engineered. Driven. Smart.

**THE mach73 DIFFERENCE:**

We aren't "consultants" offering advice; we are **Architects**. We bridge the gap between struggling NFPs and high-capacity donors by engineering business principles into philanthropic passion.

**ENGINEERING IMPACT: NFP SERVICES****1. THE HIGH-PERFORMANCE STRESS TEST**

We strip the organization down to the chassis across **10 critical points**. We identify the "drag" and deliver a **Performance Blueprint** for immediate repair.

**2. STRATEGIC ARCHITECTURE**

We re-engineer your Mission, Vision, and Values into a **5-year Roadmap** designed to handle high-speed growth without overheating your core mission.

**3. REVENUE RE-ENGINEERING**

Transitioning your model from "seeking donations" to "building investment-grade portfolios" to maximize **Donor Velocity**.

**4. THE PILOT'S SUITE (EXECUTIVE COACHING)**

Precision coaching for CEOs and Founders to enhance strategic reaction time and leadership endurance.

**5. INVESTMENT-GRADE PHILANTHROPY**

We assist elite donors in moving from "transactional giving" to "transformational impact." We treat philanthropy like an **engineered investment**, vetting organizations for a perfect match with your **Values Signature**.

**6: THE STRUCTURAL INTEGRITY TEST**

We help you identify areas for improvement and help design and build the solutions.

**THE DIAGNOSTIC STRESS TEST**

*If you identify **3 or more** failure points from below, your organization is at risk of structural fatigue:*

1. **Resource Load-Bearing:** Does social need outstrip your structural capacity?
2. **Operational RPMs:** Is your team "redlining" on daily tasks?
3. **Emergency Fuel Reserves:** Do you have less than 6 months of liquid reserves?

Engineered. **Driven.** Smart.

4. **The Strategic Roadmap:** Is your plan based on "legacy specs" (2+ years old)?
5. **Governance Alignment:** Is your Board focused on "under the hood" operations or are they focused on the bigger picture?
6. **Performance Gauges:** Do metrics favor **Activity** over **Effectiveness**?
7. **The Revenue Manifold:** Are you restricted by traditional "charity" thinking?
8. **Volunteer Reserves:** Have you built an effective cohort of volunteers who can assist in the various operations and initiatives?
9. **GPS Turned On:** Do you have a clear map of where you are heading over the next 3 to 5 years? Do all key stakeholders understand that vision?
10. **Leadership Toolbox:** Does your leadership team possess the right skills and knowledge to effectively drive the organization?

## **READY TO SHIFT GEARS?**

The difference between a charity that idles and an organization that accelerates is **Architecture**.
