**Tactical Level SITREP from the Ohio River Valley  
Post East Palestine Train Derailment**

The focus of my assessment, with limited resources and personnel has been shifted to ascertaining the real truth on what the bad actors are attempting to blanket in a shroud of smoke.

It appears the people of the Ohio River Valley, the stakeholders and farmers, are no strangers to heavy handed federal policies and the subsequent large scale corporate profiteering which has resulted from the global shift to green new deals and now carbon footprint exploitation of wealth and resources.

Understand that my BLUF "Bottom Line Up Front" and "So What" focus is an attempt to bring to light the diversionary tactics that have been so regularly played upon the citizens of this great nation. It is not an attempt to diminish the importance of the potential second and third order effects of the controlled release and burning of the listed chemicals from the tanker cars involved in the East Palestine derailment. Time and true analysis of soil samples paired with public health monitoring will reveal the actual damages pathologic toll to life. A modicum of cautious monitoring will still be required.

Based upon our four-day assessment of the surrounding areas and local Key Leader Engagements these are my preliminary findings:

- 1) On Feb. 3, just before 9 p.m. ET, a Norfolk Southern train derailed near East Palestine, Ohio, a town of about 4,800 people near the border with Pennsylvania. Nobody was hurt in the accident, officials say.
- 2) Of the 120 cars, 20 cars contained hazardous cargo. About three dozen cars derailed overall, 11 of which were carrying hazardous material, investigators said.
- 3) Five of the derailed cars were carrying vinyl chloride, a manmade substance that is a key ingredient in PVC, the hard plastic resin used widely in construction and health care.
- 4) To my knowledge a decision was made to release the chemicals and conduct a controlled release in order to destroy said chemicals and a plume of smoke resulted in a large plume of smoke rising into the atmosphere. I have not confirmed the area affected other than what was reported by early coverage and early NOAA tracking paired with prevailing winds reported on the "Windy" app. This was how we developed our movement plan and investigation zones.
- 5) Through multiple key leader engagements with local citizens groups, to include the MOVCAC group leaders and Team America citizens groups, as well as members of the Amish farming community deeper concerns for a diversionary tactic appeared to be at play. The citizen's demeanor was one of concern for those affected in the hot zone, but one of simply "here we go again."
- 6) It appears the Ohio River Valley has been a regular target of the corporate privateer and political exploitation of resources which are setting the stage for a deeper plan fitting a more globalist agenda with regard to energy, mineral, and food production sectors. A more difficult to quantify target is the attack upon the populous themselves to force a "human osmotic pressure" wave, leaving property uninhabitable and resources available for exploitation.

**KEY FACTORS REQUIRING DEEPER INVESTIGATION:**

- 1) The practice of Injection Disposal Wells resulting in the collapsing of shallow oil and gas wells owned by local mid level production companies. Note: the government is granting billions of dollars to buy "un-producing" oil wells.
- 2) Nuclear Waste / Spent Rod Site at Parkersburg (Circa 1953 - coming to "corrosion of barrel" date in 2023.)
- 3) The future \$50M investment by SEN Joe Manchin and GOV (WV) Jim Justice's project in Morgantown, WV to develop incinerator plant to burn waste and inject byproducts heavy in carbon back into the earth resulting in the privateering of CARBON CREDITS by major corporations.
- 4) The addition of seismic monitoring to the oil fields to monitor for large seismic shifts in plates shifting.
- 5) The heavy handed tactics of the Federal Government upon the farming community, as seen by the arrest of Amish farmer, Amos Miller, last year. See:  
<https://www.westernjournal.com/armed-feds-pay-visit-amish-farmer-faces-hundreds-thousands-fines/>
- 6) The mad rush to build upgraded filtration plants next to six of the largest municipal plants creating of "public terror."

As we know this whole thing (COVID, WHO Treaty Declarations, Constant State of Emergency, Energy Crisis, Food Prices and Scarcity, etc. is a war for mind and spirit and the control of humanity through demonstrated fear tactics.

The Globalist plan in Agenda 2030 was to move all people into the "15 minute cities" and take, by imminent domain the rest. In placing this model into the bigger control narrative. It makes sense. Human migratory "osmotic pressure", wars and rumors of wars, mRNA / C-19 fears, food shortages, the collapse of banking, the collapse of fiat currency, energy shortages, etc.

Fear is the tool of 5<sup>th</sup> Generation Warfare. Demoralization of a nation is a Marxist preparation of the battlefield. All with an end state of unbearable control measures, scarcity, Human Osmotic Pressure and massive die offs or, more importantly, the fear of massive die offs.

I still need to time formulate and confirm via strategic level analysis. But, in the short term the ground truth is essential in assuaging the fear and instilling calm into the chaotic "lab experiment".

The first rule of operating in a chaotic system is to "control the Controllables" otherwise we are controlled and huddled into corrals and worked like "sheep to the slaughter."

**COMPELLING HUMAN STORY:**

The attached picture of a flag of this great nation is attached. It belonged to a young lady, Anna, who lost her husband recently to the fifth generation war (COVID) we are currently experiencing.

Her home is in Marietta, OH some 200 miles southwest from the Palestine. Her flag was covered in soot from the dispersal cloud. She asked me to take her husbands flag and test the residue. She said, "please help us Doc Pete." "My husband should not die in vain. We love this valley and our families have been her for generations." "I will raise my daughters here. **THEY WILL NOT MAKE ME LEAVE!**"
