

SunTrim Plus++ —Accelerates Fat Loss...Natural Appetite Suppressant...

SunTrim is a special herbal formula to help you curb overeating and snacking to help you attain and keep the shape you want

- **SunTrim** works in the stomach, releasing herbs that signal to the digestive system that you are full. You still want to eat, but not as much.
 - These same herbs are excellent for blood sugar irregularities.
 - **SunTrim's** primary ingredient is Garcinia Indica, an Asian fruit containing HCA (Hydroxycitric Acid). This acid helps suppress appetite and inhibits the production of fat and cholesterol.
 - When eating Garcinia, excess carbohydrates are converted into glycogen, which the body can use for energy and burning fat.
 - The nutrition found within **SunTrim** includes, besides Garcinia, orange peel and herbs found in **Fortune Delight**.
- No harmful stimulants or dangerous drugs are used, only **Sunrider's** safe and regenerative food-grade herbs.
 - For weight management, add **SunTrim** to the **Sunrider** basics of **NuPlus**, **Fortune Delight**, **Calli**, and **Quinary**, for even more success: **Action Caps**, **SunFit**, and **Vitalite SunBars**. The body has many reasons for not letting go of fat. Be sure you build your health vs. just trying to lose weight; otherwise, it will all return with even more fat. Experiment and find what YOUR body needs to lose weight and KEEP IT OFF.

Ingredients: Garcinia Indica Flake, Orange Peel, Camellia Extract, Chrysanthemum Flower Extract, Jasmine Extract, Lalang Grass Root Extract
