

## ***SunSmile Herbal Toothpaste—“Once you try it, you’ll never go back!”***

- ***SunSmile Herbal Toothpaste*** polishes and cleans with natural baking soda, nourishing the gums, and, best of all, contains no Fluoride or Sodium Lauryl Sulfate.
- It is four times more concentrated than regular brands, is gentle and non-abrasive, and herbal toothpaste is safe and thoroughly effective.
- Use a pearl drop on your toothbrush - it goes a long way! Many Sunriders say a 4.75-ounce tube often lasts 6 months!
- ***SunSmile Herbal Toothpaste*** is anti-bacterial, helps prevent tooth decay, and nourishes the gums with the following:
  - **Bromelain** and other potent micro-granulated enzymes work to digest protein and food particles to eliminate plaque.
  - Refreshing and soothing herbal extracts, **Neem Tree Bark**, is a natural antiseptic used for centuries in India and Africa to clean teeth. It prevents plaque and does not break down gums.
  - **Camellia (green tea) extract** with anti-oxidants for oral health
  - **Chlorophyll** as deodorizer
  - **Grape Seed Extract** with bio-flavonoids for healthy gums
  - **Clove oil, eucalyptus oil, peppermint oil, cassia seed extract, magnolia flower extract, and licorice extract** are combined with a natural baking soda formula to deliver powerful cleaning and whitening action and an incredible, fresh, great taste.
- **Read the warning labels on other toothpastes and switch to Sunrider SunSmile! (No sugar, sodium laurel sulfate, saccharin, or industrial waste fluoride compounds of fluoride.)**
- Available in travel or full size.
- Designed to be used with ***SunSmile Refresher Drops*** and ***SunSmile Whitening Gel***.
- Your dentist and dental hygienist will ask what you are doing, and after using it, you will always feel like you just stepped out of the hygienist’s chair!

### **Toothpaste note by Dr. Tei Fu Chen**

“Most toothpastes contain fluoride, a potentially toxic chemical that thins your enamel. Fluoride is so strong it is used to etch glass! When you’re young, you can crush ice with your teeth, but when you are middle-aged like me, even drinking cold water hurts because the fluoride in your toothpaste has eaten away your tooth’s enamel. Regular toothpastes also use sodium lauryl sulfate. SLS is a grease-cutting detergent that is too strong for the mucus membrane and can cause your gums to recede. Since toothpastes have these strong chemicals, toothpaste makers need to add a lot of other stuff to mask them—saccharin, artificial colors, and artificial flavors. It’s no wonder that eating a spoonful of toothpaste will make a child sick. SunSmile® Herbal Toothpaste is designed to gently and effectively clean your teeth and gums. Instead of fluoride, we use a combination of enzymes and herbal extracts such as neem tree oil and peppermint oil. Instead of SLS, we use baking soda, a nonabrasive cleaner. Our toothpaste contains no sugar derivatives, artificial colors, or artificial flavors. Because our formula is so concentrated, it is naturally green with a clean mint flavor. Our herbal toothpaste is very expensive for me to make, but nothing else on the market works as well.”

***“Everything changed for the better when I switched to the best toothpaste anywhere!  
So happy, I’ll never go back.” Tricia***
