

MetaShaper—Live Long and Keep Your Shape!

MetaShaper™ is designed to make you feel healthier and more energetic. Key botanical components of **MetaShaper** include concentrated antioxidants, plant and soy extracts, and tea catechins. While these individual ingredients can be found in other products, Sunrider's unique concentration process and perfectly calibrated formula unleash the potent bioactivities of **MetaShaper**. Gradually your body begins to transform. Confidence is renewed. With proper exercise and a balanced diet, you can enjoy an exciting new figure and leaner appearance. **MetaShaper** helps to balance body metabolism, especially related to the fat -- recommended 1-3 capsules 3 times per day **with meals**. (Also, drink plenty of **Fortune Delight**.) **MetaShaper** focuses on changing the shape; muscles tighten. Even if we don't need to change our shape, this revolutionary formula of antioxidants will be great for everyone in their daily battle against free radicals. No other group of anti-oxidants shapes the body. Sunriders report losing inches from where they want to lose them – especially the waist and hips! In addition to **Fortune Delight**, **MetaShaper** works well with **VitaTaste and VitaShake**. Proprietary blend includes: tea concentrate, garcinia concentrate; soy concentrate; and polygonum concentrate.

Tea Concentrate contains antioxidants, green tea catechins, which scavenge free radicals before cell damage occurs. Tea concentrate contains a significant ingredient for thermogenesis and weight loss; reduces lipids and fats in the body.

Garcinia Concentrate contains Hydroxy Citric Acid (HCA), which decreases the synthesis of triglycerides (fat,) fatty acids and cholesterol. It contains a remarkable compound for burning fat and reducing appetite. Here's some proof: An 8 week study of 60 people at Georgetown University found a significant decrease of: Total body weight and Total food intake.

The same study also found a significant increase of:
Serotonin - the "feel good" brain chemical
Fat oxidation(fat burning)
Cardiovascular benefits

Soy Concentrate may improve adipose and glucose metabolism resulting in reduced body fat accumulation and insulin resistance; may help prevent obesity.

Polygonum Concentrate contains the super-enzyme **Resveratrol**, known for its anti-aging benefits. Resveratrol is nature's way of fighting disease, fungus, and bacteria. Resveratrol has antioxidant and anti-inflammatory properties. Resveratrol is found in stems, leaves, and the skin of grapes. The fermenting process in red wine raises the level of resveratrol. The resveratrol in three capsules of **MetaShaper** 3 X a day is equal to 300 bottles of red wine! **A special new fermentation extraction process at the Sunrider LA manufacturing plant produces the product.** A separate adjacent manufacturing building has been dedicated to future developments with this fermentation process.

The combination of **MetaShaper, MetaBooster and Veros or Bella** enhances youthfulness! (Dr. Chen studied cultures and their diets around the world to come up with the formula of **MetaShaper**.)

Live long and die young with Sunrider!
