

Evergreen—The Life Essence (Blood) of Plants...Purify and Alkalize Your Body!

- **Evergreen** is a refreshing alkaline liquid made of concentrated chlorophyll, the same ingredient in plants that captures sunlight and converts it into energy.
 - **Evergreen** is a highly assimilable chlorophyll source. The key word is assimilable! One vial of **Evergreen** contains as much usable and assimilable chlorophyll as an entire quart of other liquid chlorophyll.
 - The highly concentrated chlorophyll in **Evergreen** addresses the body's circulatory system and fortifies the blood. It helps bring oxygen and then repair to the cells.
- The chlorophyll in Evergreen is very healing to the digestive system—it's like a super AloeVera. It improves the absorption of nutrients and neutralizes gas.
 - Dr. Chen began researching **Evergreen**, understanding that the human body can only use chlorophyll in its natural, oil-soluble state. However, to remain stable and not spoil, all other liquid chlorophyll supplements are chemically altered into a water-soluble state during processing, and the body does not receive as much benefit from them. **Evergreen is unique in that it enters the body in the oil-soluble form.**
 - **Evergreen** is the first chlorophyll product to utilize Dr. Chen's exclusive purity-sealed single-serve bottle design, thus naturally preserving this concentrated chlorophyll source. This technology allows the chlorophyll to remain in a natural oil-soluble state, which the body can use. One vial of **Evergreen** is more potent and digestible than a whole bottle of most water-based chlorophyll products available commercially.

Among many chlorophyll benefits:

- Promotes better circulation and digestion, renews tissues, promotes healthful intestinal flora, cleansing and healing to the intestinal tract, improves liver function, helps cleanse radiation, inhibits bacteria and fungus (such as Candida), sweetens the breath, neutralizes body odors,
- **Evergreen** is an effective internal and external antiseptic, cell stimulator and rejuvenator, and red blood cell builder.
- It is valuable in lubricating the ileocecal valve and preventing constipation. This is so essential to life!
- **Enhances the immune system, helping to ward off infection**
- **Evergreen** is excellent for allergy sufferers.
- **Evergreen** is like a lubricant for the whole body to run smoothly; it moisturizes and even smoothies the skin.
- Great for athletes and for everyone to keep fit and healthy!

- A healthcare professional tested **Evergreen** and compared it to *Barley Green* by putting it on a scale of one to ten. *Barley Green* tested out as a three in terms of health benefits. **Evergreen** tested as a 13.
- Because Evergreen is so concentrated, it is much darker, and the liquid is thicker and richer than many other chlorophyll products.
- **“Evergreen” July 2006 TOTM** Dr. Steven Smith says: “Think for a minute of what is chlorophyll’s function. It is made through photosynthesis and is similar to the oxygen-carrying Hemoglobin molecule in our blood. Think of how animals graze on some fashion of chlorophyll-laden plants by which they stay extremely healthy. I have researched this chlorophyll phenomenon, which must have foundational beneficial effects. I inspire my clients to take it as well. Sunrider’s half an ounce of concentrated liquid **Evergreen** is, in my opinion, equal to a quart and a half to 2 quarts of fresh organic carrot juice. I mix a vial of Sunrider’s **Evergreen** in a cup of water and get the exact same feeling of health and energy that I derived from all the juicing I used to do.”
- **Morning Zinger:** An excellent morning drink upon rising to flush the kidneys and keep them functional is warm water, some organic lemon juice, and some **Evergreen**. This will break up crystals and stones while it cleans out uric acid. This morning’s “zinger” is perfect if you have a propensity toward kidney or bladder infections. 1 Vial + 8 lemons squeezed and drunk slowly within half an hour is great for dissolving stones.
- **Evergreen** begins to lose its nutritional effectiveness once the bottle is opened. Therefore, it is recommended that the **Evergreen** be consumed within 24 hours of opening the vial. Add one vial of **Evergreen** to one or two eight-ounce glasses/cups of Calli, Fortune Delight, or water. The ideal intake is two to three vials per day.

Ingredients: Copper Chlorophyllin (from Alfalfa), Peppermint Oil, Zinc Amino Chelate, Iron Amino Acid Chelate.

Rich in minerals, it is an excellent substitute when it is difficult to include the 4-5 suggested greens in a daily diet.
