

## ***Energy Plus— Vit. E Source!***

### ***Natural Energy Boost, Endurance, and Stamina***

**5 POTENT ENERGY-BOOSTERS** in a single, well-balanced combination

- ***Energy Plus*** includes Vitamin E bonded with Lecithin, Korean White Ginseng, Bee Pollen
- The Korean White Ginseng, Bee Pollen, and Wheat Germ Oil provide a context of wholeness for the isolate Vitamin E and semi-isolate Lecithin, a fat emulsifier (which helps the body utilize fat as a source of energy, hence the name “***Energy Plus***”).

#### **BETTER “LIFT” THAN CAFFEINE**

- The ***Energy Plus*** will give you a natural energy boost without caffeine, stimulants, or other side effects that can leave you jittery. Vitamin E is vital in energy production and increases endurance and stamina.
- When you need energy immediately, chew the ***Energy Plus*** soft gel capsule rather than swallowing it; it tastes like peanut butter.

#### **HEART HEALTHY FOOD SUPPLEMENT:**

- Because of the wholeness of the Vitamin E.
- Energy Plus contains 200 IU of Vitamin E.
- Vitamin E is essential for heart protection because it dilates the blood vessels, permitting a fuller blood flow to the heart.
- It also helps to prevent blood clots from forming.
- It can help reduce edema (swelling)
- It can help lower elevated blood pressure.

#### **SLOW AGING:**

- There is also some evidence to suggest that Vitamin E may help slow the aging process since cell aging is primarily due to oxidation, and Vitamin E is so effective as an antioxidant.<sup>1</sup>

#### **BURN MORE FAT**

- You will burn 50% less fat if you do not have Vitamin E in your daily diet.

#### **SOFT GEL**

- Sunrider is one of only four companies in America—the other three are pharmaceutical companies—that manufacture soft gels using this machine!

#### **ENJOY**

- The benefits are most significant when the formula is consistently recommended: 2 caps daily.

***“My kids say, Momma, go get some Energy Plus; you need energy,” Rose.***
