

# 6 Reasons Why Small & Mid-sized Organisations Love Meraki

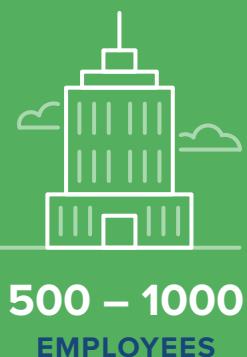

## What SMBs of All Sizes Are Saying About Us

**1 – 100  
EMPLOYEES**

**100 – 500  
EMPLOYEES**

**500 – 1000  
EMPLOYEES**

### Quick to Deploy

With the ability to pre-configure devices before they're even delivered and plugged in, IT administrators can get Meraki hardware installed and configured in no time.

### Future-Proof

It gets better over time. The cloud-based architecture allows Meraki devices to automatically download and install firmware updates with new features and security fixes.

### Empower Digitalisation

Revamping tools and processes digitally, as well as creating new ones is essential to continuous growth. The Meraki platform's intelligence and extensibility gives organisations the foundation they need to embark on a transformational digitalisation journey.

### Ideal for Lean IT Teams

Simple to manage with minimal training required, Meraki devices are ideal for organisations without a huge IT team.

### Intuitive to Manage

No command lines are required to access advanced settings anymore. All Meraki solutions are managed through the GUI-based dashboard, accessible through any browser or smartphone app.

### Full Visibility & Control

The Meraki dashboard lets IT administrators see how their networks are performing and make configuration changes across any number of networks in seconds.

*"Overall, the Meraki platform just makes life easier for a very small, internal team with a company that is spread across such a large geographic area."*

Jamie Delacey, Head of ICT,  
**Attune Hearing**

*"Our legacy switches took a whole week to set up and configure. But the changeover to Meraki only took a little over a day. Configured, installed, done. It was exceptionally easy."*

Adam Masters, Network Admin,  
**Salisbury East High School**

*"The cloud management model means that as we open up new sites and deploy new hardware, from security appliances to VoIP phones to photocopiers, all of that can be configured and troubleshooted remotely. Meraki just saves us an enormous amount of time."*

Jeremy McClure, Head of IT,  
**Property Brokers**
