COME HOME TO CUMBERLAND

WHERE YOU CAN REALLY HAVE IT ALL

The Simpson Family

Dave and Janelle Simpson moved to Cumberland County with their family, from North York, Toronto, Ontario in May of 2021. They decided they wanted to move to Cumberland County to 'Live Again'.

Dave had spent many years working, even as a soccer player, and didn't have the opportunity to live the life that he wanted. While residing in the hustle and bustle of Ontario, Dave realized he was losing time that he desperately wanted for his family, and, for himself. Traffic paired with the 8-hour workday and the cost of living, slowing down and moving to Cumberland was an easy choice.

Dave and Janelle decided they wanted to move somewhere where they'd be able to spend time

together - but they didn't know where - at first!

So, after hearing about Pugwash, Nova Scotia - and always wanting to visit - they decided to take a trip. They booked an Air BnB and after exploring the neighbouring town of Amherst, they fell in love immediately.

Once their trip was over, they were driving home and looked at each other without saying a word and just knew. Cumberland was where they wanted to create the life of their dreams.

Their plans were slightly stalled, due to the pandemic, but in May of 2021 the Simpson family moved to Cumberland, and have no intentions of ever leaving.

What the Simpsons love most about living in Cumberland is the nature, and the life they are able to live. Dave has lived in many places during his life, where people will pay a ton of money to get what is free in Cumberland.

The beaches, the hiking, the people, the fresh air and the general peace of mind of living in Cumberland are all things Dave and his family enjoy about living here.

The community also plays a major part in making them feel at home. Before the Simpsons had even moved in, their neighbours knew who they were and by day two, they were over to their home having a meal together. They also love how friendly the people of Cumberland are where they will walk up to you on the street just to say hello, or ask if you need help with anything.

Dave suggests to anyone that wants to enjoy life, be around good people and like to be outdoors, this is the place for you. He mentions "To anyone considering making the move to Cumberland, experience it for yourself. The pictures and the videos you see on Youtube about how gorgeous this place is doesn't do it justice number one, and there's only so much that you can actually show."

Dave has traveled all over the world and has met many different kinds of people, been to different places in different environments and different cultures and has decided to live here, and does not plan on ever leaving.

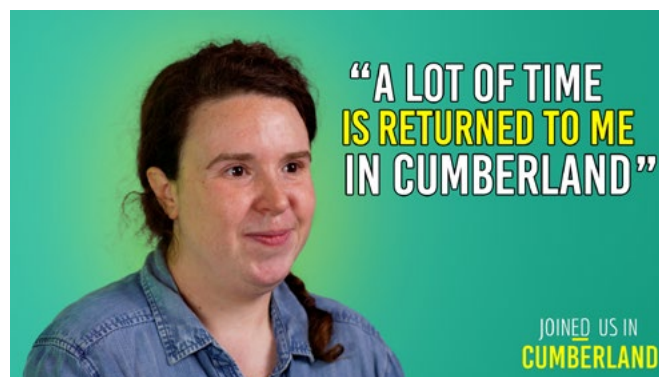

This is the perfect example of how one family completely changed the quality of life they experienced. Will your family be our next success story?

“
As soon as
we had the chance,
we bought and we moved
here and we're
never leaving.”

Ksenia
MOVED TO SPRINGHILL, NS

DISCOVER UNESCO JOGGINS FOSSIL CLIFFS WORLD HERITAGE SITE A 310-MILLION YEAR OLD STORY

Preserved in nature, uncovered by force. Explore one of nature's most inspiring creations, where the highest tides in the world reveal the most complete fossil record of the "Coal Age", 100-million years before the dinosaurs. Every rock holds the possibility of discovery, and guided tours may lead you to finding a missing piece of time's puzzle. In Joggins, your backyard may be 300-million years old but every day is different!

The swamp forests produced massive quantities of organic matter that, over millions of years, created

the coal deposits for which this period of history is named.

The Joggins Fossil Centre is situated on the reclaimed site of the Old Joggins No. 7 Coal Mine overlooking the Joggins Fossil Cliffs. The Centre provides an exceptional learning experience, featuring an extensive fossil specimen collection, exhibits, and displays.

Every single day the massive tides reveal new fossils along these incredible cliffs. Here you can see rocks and plant fossils that date back 100-million years before the dinosaurs when the earth only had a single giant continent, Pangea.

The region now attracts a variety of both local and international research projects including those directed at rift-basin development, paleontology, and resource development. Currently, researchers from Harvard University, the Smithsonian Institute, Columbia University, and others from the UK are doing work in the area.

The FORCE visitor center, 10km west of Parrsboro, overlooks the ocean test site where new tidal energy devices hope to generate electricity from the fast moving waters of the Minas Passage. FORCE provides underwater power cables to connect devices to the shore, and conducts environmental monitoring and research to better understand any potential effects.

When you visit Cumberland, this incredible historical landscape is yours to explore completely free whenever you wish.
