

**MARINE ELECTRICAL APPLIANCES
AND LIGHTING SPECIFICATION
CATALOGUE**

LED PENDANT LIGHT

Application scope:

It is suitable for illuminating places on various ships where there are dripping, splashing, and condensation, such as boiler rooms, dry cargo holds, pipelines, open decks, etc.

Product features:

1. The shell is made of high-quality steel or stainless steel by stretching.
2. The lampshade is made of high-strength and high-transparency PC.
3. The light source has a lifespan of 30,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: Ra≥80.
6. Working temperature:-30°C to 50°C

Specification

| Type | Voltage | Power | Light Source | Colour Temperature | Lamp Holder | Luminous Flux | Material | Size | | Class of protection |
|------------|----------|-------|--------------|--------------------|-------------|---------------|-------------------------|------|-----|---------------------|
| | | | | | | | | L | L1 | |
| UJCY22-2L | 110/220V | 10W*2 | LED Tube | 6000K-6500K | G13 | 1600lm | Iron or Stainless Steel | 692 | 480 | IP66 |
| UJCY22-2LE | | 10W*2 | | | | | | | | |
| UJCY42-2L | | 20W*2 | | | | 3200lm | | 1299 | 700 | |
| UJCY42-2LE | | 20W*2 | | | | | | | | |

Please indicate before ordering: **E** after the model number means with emergency light (B15d, 24V, 3.5W, LED light source), **M** means module LED, **B** means with emergency battery device, **S** means stainless steel Material.

LED PENDANT LIGHT

Application scope:

It is suitable for illuminating places on various ships where there are dripping, splashing, and condensation, such as boiler rooms, dry cargo holds, pipelines, open decks, etc.

Product features:

1. The shell is made of high-quality steel or stainless steel by stretching.

LED PENDANT LIGHT

UCCD9-6L

UCCD9-5L

Application scope:

It is suitable for illuminating places on various ships where there are dripping, splashing, and condensation, such as boiler rooms, dry cargo holds, pipelines, open decks, etc.

Product features:

1. The shell is made of high-quality brass.
2. The lampshade is made of high-strength and high-transparency glass.
3. The light source has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: $Ra \geq 80$.
6. Working temperature: -30°C to 50°C .

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection | Cable OD |
|--------------|----------|-------|------------|---------------|--------------------|----------|---------------------|----------|
| UCCD9 - 6LM | 85V-240V | 13W | LED | 1200 lm | 5000K-5500K | Brass | IP66 | Ø8-12mm |
| UCCD9 - 6ALM | 24V | | | | | | | |
| UCCD9 - 5LM | 85V-240V | | | | | | | |
| UCCD9 - 5ALM | 24V | | | | | | | |

LED PENDANT LIGHT

UCCD2-1-2L

UCCD4-1L

Application scope:

It is suitable for illuminating places on various ships where there are dripping, splashing, and condensation, such as boiler rooms, dry cargo holds, pipelines, open decks, etc.

Product features:

1. The shell is made of high-quality aluminium.
2. The lampshade is made of high-strength and high-transparency glass.
3. The light source has a lifespan of 30,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: $Ra \geq 80$.
6. Working temperature: -30°C to 50°C .

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection | Cable OD |
|----------------|-----------|-------|------------|---------------|--------------------|-----------|---------------------|----------|
| UCCD2 - 1 - 2L | 100V-240V | 9W | LED Bulb | 900 lm | 5000K-5500K | Aluminium | IP66 | Ø12-14mm |
| UCCD4 - 1L | | | | | | | | |

LED WORKLIGHT

Application scope:

It is suitable for illuminating places on various ships where there are dripping, splashing, and condensation, such as boiler rooms, dry cargo holds, pipelines, open decks, etc.

Product features:

1. The shell is made of high-quality Synthetic resin.
2. The lampshade is made of high-strength and high-transmittance PC.
3. The light source has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: Ra≥80
6. Working temperature:-30°C to 50°C

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection | L Size |
|-------------|-----------|-------|------------|---------------|--------------------|-----------------|---------------------|--------|
| UCCD5 - 2LM | 24V | 13W | LED | 1200 lm | 5000K-5500K | Synthetic resin | IP66 | 189mm |
| UCCD6 - 2LM | 100V-240V | 13W | | 1200 lm | | | | 189mm |
| | | 30W | | 2900 lm | | | | 212mm |

LED WORKLIGHT

Application scope:

It is suitable for illuminating places on various ships where there are dripping, splashing, and condensation, such as boiler rooms, dry cargo holds, pipelines, open decks, etc.

Product features:

1. The shell is made of high-quality Synthetic resin.
2. The lampshade is made of high-strength and high-transmittance PC.
3. The light source has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: Ra≥80
6. Working temperature:-30°C to 50°C

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection | L Size |
|------------|-----------|-------|------------|---------------|--------------------|-----------------|---------------------|--------|
| UDS7 - 1LM | 24V | 13W | LED | 1200 lm | 5000K-5500K | Synthetic resin | IP66 | 205mm |
| UDS7 - 2LM | 100V-240V | | | 1200 lm | | | | 228mm |
| | | 30W | | 2900 lm | | | | |

LED WALL LIGHT

Application scope:

It is suitable for illuminating places on various ships where there are dripping, splashing, and condensation, such as boiler rooms, dry cargo holds, pipelines, open decks, etc.

Product features:

1. The shell is made of high-quality Synthetic resin.
2. The lampshade is made of high-strength and high-transmittance PC.
3. The light source has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: Ra≥80
6. Working temperature:-30°C to 50°C

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection | L Size |
|-----------|----------|-------|------------|---------------|--------------------|-----------------|---------------------|--------|
| UWB - 1LM | 24V | 13W | LED | 1200 lm | 5000K-5500K | Synthetic resin | IP66 | 245mm |
| UWB - 2LM | 85V-240V | | | 1200 lm | | | | 268mm |
| | | 30W | | 2900 lm | | | | |

LED WALL LIGHT

Application scope:

It is suitable for illuminating places on various ships where there are dripping, splashing, and condensation, such as boiler rooms, dry cargo holds, pipelines, open decks, etc.

Product features:

1. The shell is made of high-quality Synthetic resin.
2. The lampshade is made of high-strength and high-transmittance PC.
3. The light source has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: Ra≥80
6. Working temperature:-30°C to 50°C

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection | L Size |

| UWB - 2BLM | 85V-240V | 13W | LED | 1200 lm | 5000K-5500K | Synthetic resin | IP66 | 220mm |
| | | 30W | | 2900 lm | | | | 243mm |

LED CEILING LIGHT

- Application scope:**
It is suitable for illuminating walkways, laundry rooms, bathrooms, conference rooms, control rooms, and restrooms in various types of ships and offshore oil platforms.
- Product features:**
1. The shell is made of high-quality aluminum material.
 2. The lampshade is made of high-strength and high-transparency PC.
 3. The light source has a lifespan of 50,000 hours.
 4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
 5. LED colour rendering index: Ra≥80
 6. Working temperature:-30°C to 50°C

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection |
|--------------|---------------|--------|------------|---------------|--------------------|-----------|---------------------|
| UJPY24A - EL | 100V-240V+24V | 24W+5W | LED | 2000 lm | 4000K-4500K | Aluminium | IP66 |

LED BEDSIDE LAMP

UJTY08 - 1CL

Application scope:
It is suitable for bedside lighting in living quarters of ships.

- Product features:**
1. The shell is made of high-quality iron.
 2. The lampshade is made of high-strength and high-transparency PC.
 3. The LED module has a lifespan of 50,000 hours, the LED tube has a lifespan of 50,000 hours.
 4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
 - 5.LED colour rendering index: Ra≥80
 6. Working temperature:-30℃ to 50℃

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection |
|---------------|----------|-------|------------|---------------|--------------------|----------|---------------------|
| UJTY08 - 1CL | 85V-240V | 5W | LED Module | 500 lm | 4000K-4500K | Iron | IP34 |

LED CORNER LIGHT

UJBY20 - 1L

LED MIRROR LIGHT

| Type | L | L1 |
|------------|-----|-----|
| UCBD17 - C | 488 | 300 |
| UCBD17 - E | 640 | 455 |

Application scope:
Applied to the illumination of such wet places as sidewalk, washroom, bathroom, sailors and rest room etc.

- Product features:**
1. The shell is made of high-quality iron.
 2. The lampshade is made of high-strength and high-transparency PC.
 3. The LED module has a lifespan of 50,000 hours, the LED tube has a lifespan of 50,000 hours.
 4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
 - 5.LED colour rendering index: Ra≥80
 6. Working temperature:-30℃ to 50℃

Specification

| Type | Voltage | Power | Illuminant | Luminous Flux | Colour Temperature | Material | Class of protection |
|--------------|----------|-------|------------|---------------|--------------------|----------|---------------------|
| UCBD17 - CL | 85V-240V | 10W | LED | 800 lm | 6000K-6500K | Iron | IP34 |
| UCBD17 - CLM | | | LED | 1000 lm | | | |

LED NAVIGATION SIGNAL LIGHT

Application scope:

Applied to the ships with the length 50m or above 50m as lamp signal liaison when night navigation.

Product features:

1. The shell is made of high-quality engineering plastic.
2. The lampshade is made of high-strength and high-transparency PC.
3. The LED module has a lifespan of 50,000 hours, the LED tube has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. Working temperature:-30°C to 50°C

Standard:

- 1.Conform to 《THE INTERNATIONAL REGULATIONS FOR PREVENTINGS COLLISION AT SEA,1972》 and 《GRADE ENTRY NORMS FOR STEEL SHIPS》 .
- 2.Conform to the international standard IEC60598-1-2008.
- 3.Conform to the standard of marine electric signal light's technical condition GB/T 3028-1995.

LED NAVIGATION SIGNAL LIGHT

Technology Explain:

This series of navigation signal lamps are new products based on the original double-layer structure and through technological upgrading. The optical structure is still double-layer and meets the requirements of IEC60945:2002 standard and Chapter Ⅲ of the 1972 International Regulations for Preventing Collisions at Sea and its amendments. The improved products have the advantages of light weight reduction, more reasonable structure and more stable and reliable optical performance.

Application scope:

Applied to the ships with the length 50m or above 50m as lamp signal liaison when night navigation.

Product features:

1. The shell is made of high-quality brass.
2. The lampshade is made of high-strength and high-transparency PC.
3. The light source has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. Working temperature:-30℃ to 50℃

Standard:

- 1.Conform to 《THE INTERNATIONAL REGULATIONS FOR PREVENTINGS COLLISION AT SEA,1972》 and 《GRADE ENTRY NORMS FOR STEEL SHIPS》.
- 2.Conform to the international standard IEC60598-1-2008.
- 3.Conform to the standard of marine electric signal light's technical condition GB/T 3028-1995.

LED SPOT LIGHT

Application scope:

This product is suitable for outdoor lighting in various ships, vessels, port terminals, cargo yards, and sports fields. It provides uniform and bright lighting, ensuring safety and visibility in the area.

Product features:

1. The shell is made of high-quality stainless steel.
2. The lampshade is made of high-strength and high-transparency tempered glass, providing uniform and bright lighting.
3. The light source has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: Ra≥75.
6. Working temperature:-30°C to 50°C

Specification

| Type | Voltage | Power | Illuminant | Luminous flux | Beam Angle | Colour Temperature | Material | L Size | Class of Protection |

LED SPOT LIGHT

Application scope:

This product is suitable for outdoor lighting in various ships, vessels, port terminals, cargo yards, and sports fields. It provides uniform and bright lighting, ensuring safety and visibility in the area.

Product features:

1. The shell is made of high-quality aluminium,and the bracket is stainless steel .
2. The lampshade is made of high-strength and high-transparency tempered glass, providing uniform and bright lighting.
3. The light source has a lifespan of 50,000 hours.
4. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
5. LED colour rendering index: Ra≥75.
6. Working temperature:-30°C to 50°C

LED SEARCH LIGHT

Application scope:

It is suitable for long-distance exploration lighting during night navigation of ships and vessels. It can illuminate the waterway and both sides of the narrow channels, inland river channels, and other complex water areas.

Product features:

1. The shell is made of high-quality stainless steel and aluminium.
2. The lampshade is made of high-strength and high-transparency tempered glass.
3. LED multi-module design, each module can be replaced and repaired separately.
4. The light source has a lifespan of 50,000 hours.
5. It is a green and environmentally friendly product, energy-saving by more than 50% and easy to install.
6. LED colour rendering index: Ra≥75.
7. Working temperature:-30°C to 50°C.
