Programming Services

Service Model

Step 1

Understanding the needs and required profiles.

Step 2

Generation, Review and Approval of Job Descriptions.

Step 3

Recruitment & Selection based on Job Description
(between 15 to 20 days - includes client interview)

Step 4

Selected resources Allocation & On boarding. Weekly performance review based on Backlog Requirements.

Programming Languages

HTML, Java, PHP, Python, Dart, NodeJS, Kotlin, Swift, Go, R, C, C++, ABAP ...

Tecnologies

Oracle, SAP, Microsoft, Google, Meta4, RedHat, WSO2, PIMCORE, PostgreSQL, Kubernetes, Sonarqube, Kafka, Gitlab, Git, DigitalOcean, Matrix, Harbor, Jitsi, Cassandra, Hadoop, Solana, MariaDB, MongoDB, VMWare, OPManager, ServideNow, GLPi, ...

Methodologies

SCRUM Agile, PMI, TOGAF, ITIL

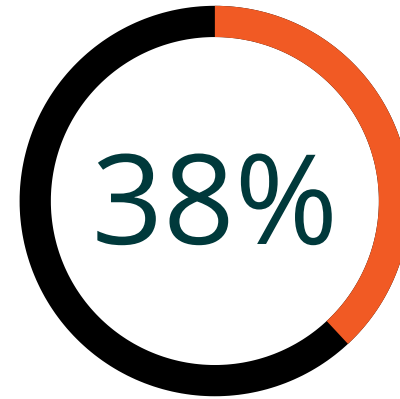

Management

The developers report their progress based on the backlog requirements both in our management platform and in the one established by the clients.

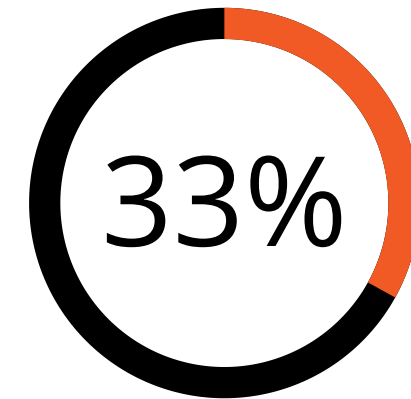

SPECIFICS

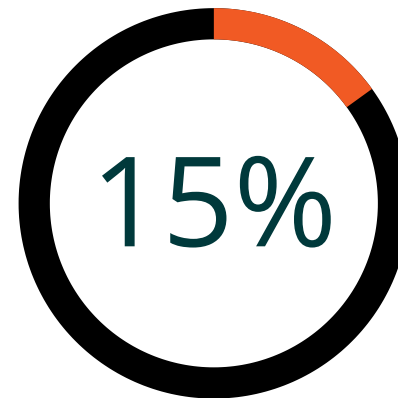

ADDITIONAL INFORMATION

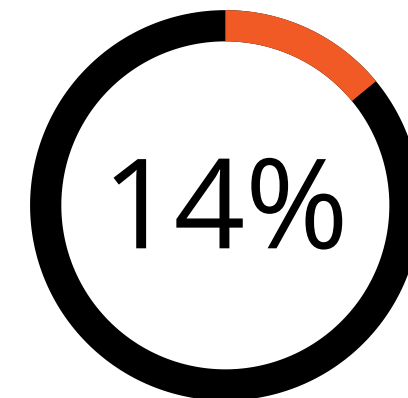

Resources allocated for
Support Desk and
Application Management

Resources allocated for custom
projects within organizations
(custom developments, cloud
migrations, ...)

Resources allocated for PMO

Resources allocated for
Infrastructure Management

References

A dark-themed photograph of a desk setup. Two computer monitors are visible. The left monitor displays a code editor with syntax-highlighted code on a black background. The right monitor displays a web application interface with a sidebar and main content area. In front of the monitors is a keyboard and a mouse. To the right, a smartphone is mounted on a stand, displaying a colorful app interface. The background is a dark red wall with some bokeh light effects. The word "References" is overlaid in large, white, sans-serif font across the center of the image.
