**PVC WALL BASE BOARD**

300 mm x 8 mm x 10 feet

Application: Covering undulations in plastered walls to paste D-stona.

**ACCESSORIES**

**D-STONA INSTALLATION PROCESS**

Dstona fabrication requires almost the same tools that are used for wood fabrication. It can be cut into required sizes using a mitre saw or a hand cutter and for final adjustments a planer knife can be used over the edges, Compared to many traditional products, Dstona is hassle free to install and requires no polishing or maintenance. Generally pasted on our 'PVC wall base boards' using structural silicone adhesives, It can also be pasted over cement and wood surfaces. And with our metal section accessories, Dstona sheets can be quickly fixed using just screws, saving cost on both labour and adhesive.

Molding cutting using a miter saw.

Molding joint surface planing using a planar knife.

Molding pasting using adhesive.

Joint in moldings.

Sheet cutting using a hand cutter.

Sheet pasting using adhesive.
