

## HOW TO CREATE YOUR OWN CUSTOM MINIATURE

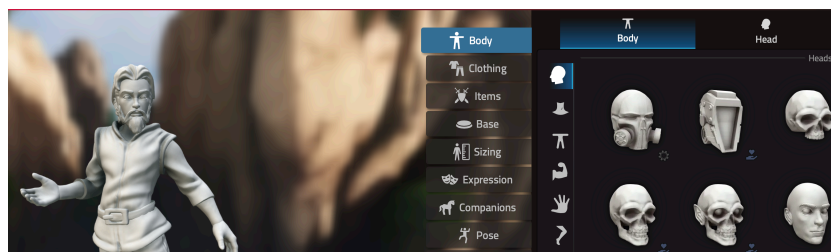

Visit [titancraft.com](https://titancraft.com)

(You do not have to create an account, but accounts are free and you can save your character.)

Go to character creator, then click add a character. This opens a selection box where you can select from various types of base characters or creatures. Select a base character and click to add to scene.

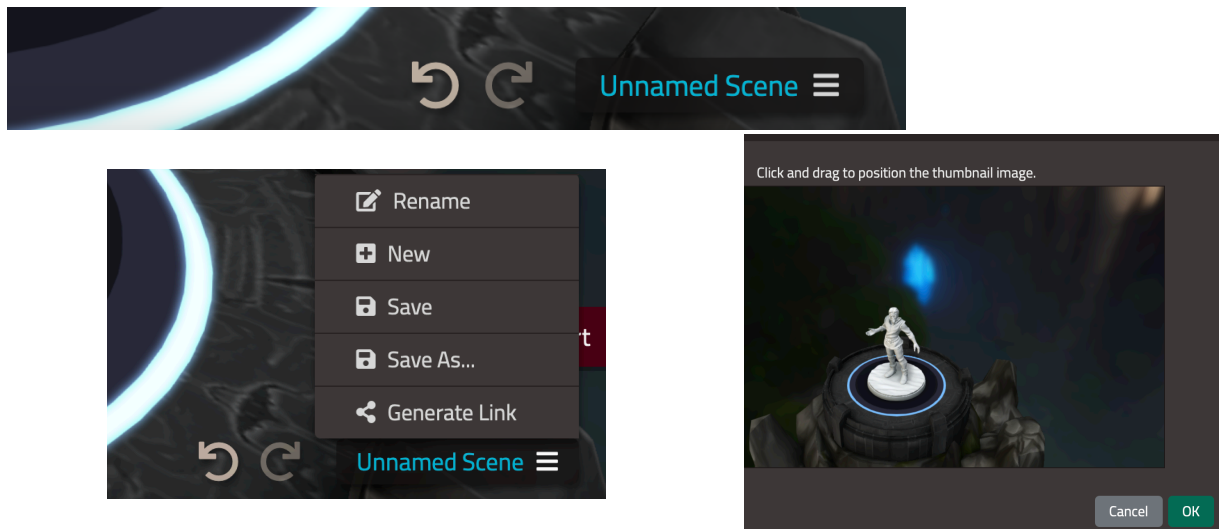

You will be able to pick through the various items on the right side to create your character. You should have access to all items.

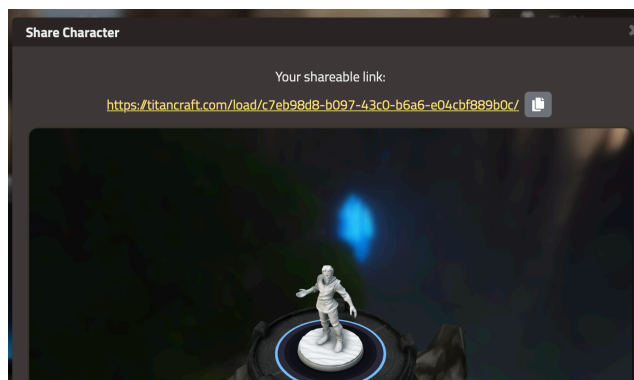

Once you have completed making your character, DO NOT ADD TO CART. (If you have created an account you can save your creation.) In order for us to print, you will need to create a shareable link by clicking where it says Unnamed Scene and choose Generate Link. You can just click ok when prompted to create a thumbnail.

Once you have completed making your character, DO NOT ADD TO CART. (If you have created an account you can save your creation.) In order for us to print, you will need to create a shareable link by clicking where it says Unnamed Scene and choose Generate Link. You can just click ok when prompted to create a thumbnail.

This will create a sharable link you will email to [kevin@dragonflycomics.com](mailto:kevin@dragonflycomics.com). This makes it free to email us a link to the STL file. We will import your file to our account for review.

Once reviewed, we will email you back about any changes that we may need to make, provide an estimated day for pick up, and confirm a price for printing.
