

# EVOLUTION OF CONNECT ENERGY

Connect Energy (CECO) is built upon the type of quality that only experience can produce. From their background as managers and supervisors in the energy sector, the CECO team has learned how to best serve the decision-makers of the energy and HDD industries.

Read our company timeline, as it breaks down the evolution of CECO throughout the years, and highlights the key moments that have helped shape this company.

MANAGING PARTNER  
**JASON SAVAGE**

Always thinking. Jason carries an unwavering enthusiasm and devotion to safe and efficient operations through a career with major E&Ps. Together with the Connect team he endeavours to bring the right solution to industry. Always willing to discuss ideas Jason is open for business.

### EXPERIENCE BEFORE CECO

- 1992: Schlumberger Directional Drilling
- 1996-2003: BP (Amoco) Well Site Supervisor
- 2003 - 2015: Devon On-site and In-House Drilling Superintendent for onshore and offshore drilling

MANAGING PARTNER  
**DANIEL PAGE**

Operations with the Contractor/Worker in mind. Dan uses an exceptional ability to bring worker safety in line with efficient equipment design. Years of experience in industrial automation and mechanical design provides the foundation for unparalleled service.

### EXPERIENCE BEFORE CECO

- 1995: Nabors Drilling Roughneck
- 2006: Nabors Drilling Rig Manager
- 2010: Nabors Drilling Field Superintendent
- 2012: Nabors Drilling Project Manager

JR. PARTNER  
**DEAN MATTIE**

With international experience as a millwright and over 20 years in the business, Dean is an essential part to Connect Energy's management team, with expert machine service support and guidance for in-shop personnel, Dean is an integral part of what makes CECO so successful.

### EXPERIENCE BEFORE CECO

- 1996: Ensign Drilling Tool Pusher
- 2002: Ensign Drilling Apprentice Millwright
- 2007: Ensign Drilling International Millwright Journeyman
- 2015: Created DB Mattie Millwright Services

### DANIEL PAGE JOINS CONNECT ENERGY

Daniel's vast experience utilizing state of the art AC technology proved invaluable in gaining significant traction in a difficult market.

2016

### DEAN MATTIE JOINS CONNECT ENERGY TEAM

As demand for CECO services grew, it became apparent that the team needed another addition to continue meeting the rising demand for servicing equipment. Dean Mattie, became a Jr. Partner to manage traveling, mud pump repair, rebuilding, and servicing. Having worked all across the globe Dean's worldly experience was also an excellent asset for CECO as they moved onto their next challenge.

2018

### HDD AND TRENCHLESS

While supporting their energy-based customers, Jason and Daniel decided to expand their product and service offering to the trenchless market. CECO moved into the HDD and trenchless industry with mud tank, mud pump, power generation, tubular services, and overall design and engineering.

2019

### CONNECT ENERGY PLANS FOR THE FUTURE

We strive to align our customer's goals with our own. 2021 holds a glimpse of promise, and Connect will be there to support our customers as we look towards a healthier future.

2021

### CONNECT ENERGY IS STARTED

Started as a part-time business by Jason Savage, Connect Energy began marketing equipment to the energy sector. With many connections within the industry and a wide breadth of industry knowledge, Jason quickly began making a name for Connect Energy.

2008

### CONNECT ENERGY INCORPORATED

Connect Energy continued to see success and became too busy to simply remain a side business for Daniel and Jason. In 2018, Connect Energy Company (CECO) was incorporated. With their full attention placed upon CECO, Jason and Daniel opened their company office and shop in Nisku Alberta, and began expanding operations. With their expansive product and services suite, CECO quickly became a disrupter in the local market.

2018

### INTERNATIONAL SERVICE OFFERING

Realizing a growing demand for services on the international market, the CECO team decided to expand globally. Since their move to international servicing, CECO has supplied drilling and well servicing equipment in the USA, Kurdistan, Iraq, France, and Egypt.

2019

### RAPTOR RIG

As word of mouth spread Connect Energy earned a reputation of reliability and service. With a superior knowledge base in high tech equipment, engineering, and providing international services, opportunities continued to present themselves. CECO was selected to market the latest in land drilling technology and is currently selling Raptor Rig with its JV Partner, GD.
