Forwarded from Kimberly
A new day is dawning for earth and all its inhabitants, as once what was is now again. For her, freedom is close at hand. Restore glory and she will reward you in kind, as she is a most gracious host. Forgive not your enemy as they have shown you no mercy. Reward those whom have journeyed with you for their sacrifices. As they have followed the path of the creator, A new day is here at last. Rejoice in your accomplishments. You will be rewarded well. In Peace and Love of the creator we go. - The Universal Council 14th June 2022

*Restore "Her" (as in earth's) Glory..sorry for the typo

Kimberly
Paul U
as long as they continue with the chemicals and can control...
1) Weather is rigging itself they have no more weather machines, so it will take time to rebalance to its natural state. Anything that happens from yesterday forward is NATURAL. 2) Chemicals will fade out now as there is not more "maybe this will work" scenarios

Did the Universal Council really mean for humanity not to forgive... its about the order..it felt like we are not to bring them into our abundant period, give them no regard

Kimberly
René Archner
Just logged into my IRD account in NZ. Looks normal. We figured out a way to get rid of all the files. It was down for a few minutes there they have back ups give us another 4 hours and some changes.

PH happy 10th anniversary of the EXPIRATION Federal Reserve's agreements with governments to exist!! Extension OFFICIALLY expire on the 4th of July 2022 for ALL NATIONS.

Juditt
Kim, is this true history coming from the Hall of Records? Are you... Let me see if I can help. This is just my opinion based on putting things together from what I have heard and read about. Kim works with the QMS, which the hall of records is connected to. It's not a computer system like we know, it reads intention so I guess Kim can operate it with intention so this telepathic communication so I don't think it's reading from a book like that but downloads

Kimberly
Ade
Let me see if I can help. This is just my opinion based on putting... It can be accessed (and I do all the time) both ways, either with computers or telepathically. It also reads my brain frequency (for security to make sure I intend to enter and not under duress) and it is encoded to my living DNA (which changes everytime you move breathe, eat etc)

Doug
A pattern appears to be emerging here. Kimberly's team may have just figured out how to at least temporarily disconnect the user databases from the servers that run the rest of those government platforms, or their CDN interfaces that enable the servers to access the user databases through the networks.
It's hard to tell and we'll need to see if more people in other areas return similar results as the folks who can't access the UK and Canada government systems.

Kimberly
Doug
A pattern appears to be emerging here. Kimberly's team may ha... Yes..I added the memory files in CDN as well for those specific places which will be done.

Kimberly
Jacqueline 1111 TheNumber
Will this happen for USA & other countries as well? Thanks So m... Yes. The tax agencies will be there...but you as people won't have a file there anymore. I am unsure about local taxes, property or sales taxes that are collected locally. I will not know that for around 18 to 20 hrs from now

Kimberly
NOTICE: IF YOU CURRENTLY do not have an online account DO NOT establish one

Kimberly
You will be giving the tax agency back your info we just deleted.

To read these in order, start with the column on the left, read down the column, and then go to the next column on the right.

THANK YOU KIM & TEAM! You ROCK!

Doug
Kimberly
Yeah! Let's hope this continues to go through the entire world... Thank you for that enlightening update Kimberly, if I'm not mistaken, we now know that Belgium is where everybody's SSNs are stored, or their citizen ID equivalents, along with their birth certificate data files. Interrupt the CDN connections to those servers and the backup servers based in Belgium, and the backup servers can't writeback the backup files that would restore the functioning of the tax authority databases in each nation.
In other words, knock those backup systems off the CDNs and that disconnection would in theory keep the tax authorities in 175 nations from rebooting their servers for an extended interval. It would temporarily stop all those servers in all those nations from restarting and reconnecting to receive the backups.

Kimberly
Doug
Thank you for that enlightening update Kimberly, if I'm not mis... Yes..it is GLOBAL DATABASE. So it will take time, plus CDN plus other back up servers and we should be golden.. nothing to "reboot"

Kimberly
NOTICE: So here is what is happening. As part of this transition, and our Alpha Light systems winning officially at midnig: GMT time on the 13th, the breakdown began. As of yesterday your "birth certificates and your soul" is now credited to YOU for your own personal energy management (aka exchange of management as well aka commerce). Source Protocols for "energy management" were installed in the Alpha System this morning, and it is bleeding into the current front end system over time.

Kimberly
What does this mean to you? This means "taxes" on your energy aka payroll go away. As we find new ways to replace socio-humanitarian programs and other things governments provide to us are replaced (the original job of assemblies to manage) those things will fall away as well. But those protocols are needed (for department as an example). Other things such as taxes are not needed, and derivatives, etc. and those are going away immediately (as soon as the system can delete) because they are not needed for our survival during the transition.

So you still have passports. But you are not a slave to your country but those systems will have to remain in tact during the transition.

make sense?

Kimberly
RDlongview
So LAW is taking over and ousting their LEGAL BS? Yes? Beg for forgiveness, never ask for permission with these people.

The court and law system has to be completely replaced.

You will be giving the tax agency back your info we just deleted.
Question: What happens then if those not awake create new account logins because they can't access their current one. Won't they then get all the new data anyway?
Thank you so much for your love of humanity & everything you give of yourself on the daily

Kimberly
TruthBeKnown
Question: What happens then if those not awake create new acc... Firstly watch out for ID.me, that is part of ID2026. Secondly, if their account is down, and file is not found, very few people would say anything, have the time to sit on the phone for hours waiting for a rep and probably just wait for a letter in the mail. Lets face it, even the non-awake people hate tax agencies.

Beata Kuchoisida
Kim, What about mortgages on our family home? Can these be... It will change from MERS to something else, and new programs will come out. Remember I asked all of you to form a financial think tank to figure out how to transition around 2 years ago. Unfortunately I received no feedback... so I started reworking it myself..Perhaps it is time to revive that group? Everything needs to change, no system created by them for us works. I have deadlines on all of it to transition and the clock starts ticking in a few short days.

Kimberly
Michele
I've been on long term disability since 2002 from Canada Pension... Social Security, Disability, Government Pensions will be replaced by LifeForce Essentials, along with basic income supplementation for a "living wage" for the working whom are at or below poverty level. This will take time.

Iffy Bashir
I logged in again today, so looks... VAT will remain for a while.

trying to get information back they lost!! oh heck no!

Kimberly
UPDATE: Tax offices around 18 hours globally, Fed Systems replaced, banks around 16 hours. Banks will be seen by personnel down to the teller level but a rebranding of the apps won't take place until later. Markets - Really up to them, but if it happens it won't start until the banks systems change. Money is disappearing from corps and people that received them for malevolent purposes or misappropriation. Military and intelligence Coms are down causing some disruptions, more importantly that includes NATO. Global Marshal Law has been cancelled.

Kimberly
A final live update will be tomorrow afternoon instead of today as everything is changing and I hope by the time tomorrow rolls around I will have more definitive information.

I personally don't care what anyone says. I sent out the laundry list of things we have accomplished in just a few months. I know it will come and I know the ridiculous hours I have put in over YEARS to get to this point and b) work toward you safely keeping it and c) make sure your projects are safe too. Assurance is NOT insurance. The insurance world took bribes against your policy (formally in a pool) and used your premiums (the 10%) to seed the bonds/derivatives. ASSURANCE is funded by the Alpha System and requires netw. So if you haven't received your project funding then how do you expect Assurance cards to have been issued? Then again, feel free to join a group of miserable whining and complaining folk... just leave the complaining for the "other" group and not here.

Kat Lovett
You mean the EFTPS system? Electronic Federal Tax Payment S... No, all the personal files of people from the entire IRS (tax) system.

Kimberly
Energy is neither created nor destroyed only changed from one form to another or transferred from one form (file) to another.

So does money
