In The Netherlands, strong feelings are emerging of taking back our own power, due to the harsh and rigid attitude of our Cabal rulers who want to 'talk' (i.e. persuade) but refuse to listen to our farmers, of whom four have hung themselves in the past few days because they do not see a way out of this mess. There's really a gathering of momentum and the emotional 💩 is just about to hit the fan. As someone very clearly put it: farmers are feeling what the consequences are and will be of this devastating Cabal agenda (taking our lands and houses, to manage and control our food supplies) while most city-zens are still quite unaware of it. I can see the amount of people who are buying their goods locally directly from farmers increase by the minute, and there is a collective call going around in the activist groups to skip the supermarkets, meaning: the large Cabal corporations. So creativity is gaining momentum but so are the sensations of lethargy. Are we being targeted with energy weapons?? 19 d 11 9 3 2-Jul-2022 https://t.me/c/1688716656/158740 Kimberly Reply Hanneke It's really getting crazy... So many lightworker... Yes. Ketosis is a great process to lose weight in the short term but it is extremely harmful in the long term. It's meant to help humans survive during famines and scarce food supply. Intermittent fasting causing ketosis is very helpful. But it is limited in the amount of hours a day that you produce ketones. It takes several hours for your body to produce ketones from your last meal. So you have a few hours in ketosis with intermittent fasting. Most ketotic diets require you to eat high fats and high protein primarily animal protein content. This is an extremely unhealthy diet. The healthiest diet is plant-based. It is OK to eat animal proteins however just realize that societies that are more advanced than us across the galaxy eventually move to a plant-based vegan diet and eventually get to a point where they do not require eating at all. If they do eat meat, it is under the condition that the animal has agreed to allow them to eat him or her. 7:47 PM 7-Jul-2022 https://t.me/c/1688716656/165489 Kimberly Reply Danielle Ciccarelli Ketosis is a great process to lose we... Alright!! Depends on what you are looking to do. For starters, Women need around 50 grams of protein per day just to function properly, men around 80. To build and/or maintain muscle you need around 1 gram per day per pound of lean body mass. To build, double it. I personally don't do any salt when I cook because their is salt in everything already, but I use a lot of spices. Za'tar and Curry being two of my favs! Really depends on what your goals are!! While in Brazil I discovered pao de queijo, or Brazilian cheese bread, made with cassava, aka tapioca flour/starch. It's a bit rubbery, but quite tasty with some spices and cheese mixed in. It's not easy to make from scratch because of the flour/starch ratio, but in the U.S. you can buy Che'be' bread mixes to make rolls, pizza crust, bread sticks and other forms of bread as a substitute. It's only good the day you bake it, but you can make up a batch and freeze portions until needed. Things like that recipe are on "treat or cheat" days.. I make a lot of baked goods (cooking with music helps me relax) which I pawn off on my daughter and her friends lol. As for me, mostly vegan protein shakes, veggies (beets often), rice, rice or chia seed noodles, potatoes, gluten free oatmeal, buckwheat and chicken. I don't eat pork, rarely cheese or dairy (I like Califa Farms Almond Milk) and once maybe a year do I eat lean red meat. I eat gluten free except for sprouted bread. I take NAC (have for 20 years), Dr. Group's Intramax, Vitamin B complex, EmergenC 2x a day and Aminos daily... and I avoid most all salt. I never eat anything with corn syrup in it, nor canola oil. One of my favorite "fries" is to cut potatoes, sweet potatoes and beets into fry size slices and roast in the oven with Rosemary, Thyme, Pepper and a light spray of olive oil. 8:16 PM

Personally, I feel this will not happen, but want to know if you are aware of the situation; A friend in NZ just received this email from her lawyer friend: July 2022 They are coming for the children after the school holiday's and locking the schools down for 72 hours. Don't send your children to school and warn any friends, family if they do they will have no access to their children who under the cover of the Covid Emergency Health Response Act, they will not see their children for 72 hours. The schools are preparing for the lockdown. Inside intelligence will be sent to you within 24 hours of the lockdown. Both lockdowns have been predicted absolutely within 24 hours by inside intelligence of this Globalist Government Psychological Operation of both previous lockdowns. WARNING all parents DO NOT SEND your children to school under any circumstances whatsoever. Under the Act, Heath Officers have absolute control of your children at the schools in lockdown, including vaccination coercion without parental consent under the fear of an out break of the Monkey Pox pandemic - which has been planned and the vaccinations given to the children is another fear money, power experiment of the most invasive medical experiment ever in human history. The power under the Covid Emergency Health Response Act gives the Government full power to remove your children to any health facility of their choice for further experimentation. You have been warned as a parents to beware of the authorities and how little power you have after your children have been locked down. There will be a Military presence. The children have been prepared for this moment and will not be able to contact their parents. They have been groomed for further control over their lives and the parents no longer have any guardian rights at all under the Emergency Covid Health Response Act. I will send you this WARNING again within 24 HOURS of Lockdown. You have freewill to

heed or ignore this WARNING. Love and Blessings

Nanoparticles of semiconductors - quantum dots - were theorized in the 1970s and initially created in the early 1980s. If semiconductor particles are made small enough, quantum effects come into play, which limit the energies at which electrons and holes (the absence of an electron) can exist in the particles. As energy is related to wavelength (or color), this means that the optical properties of the particle can be finely tuned depending on its size. Thus, particles can be made to emit or absorb specific wavelengths (colors) of light, merely by controlling their size. quantum dots are crystals that have the ability to convert a spectrum of light into different colors Quantum dots are nanoscale man-made crystals that have the ability to convert a spectrum of light into different colors. Each dot emits a different color depending on its size. (Image: RNGS Reuters/ Nanosys) Quantum dots are artificial nanostructures that can possess many varied properties, depending on their material and shape. For instance, due to their particular electronic properties they can be used as active materials in single-electron transistors. The properties of a quantum dot are not only determined by its size but also by its shape, composition, and structure, for instance if it's solid or hollow. A reliable manufacturing technology that makes use of quantum dots' properties - for a wide-ranging number of applications in such areas as catalysis, electronics, photonics, information storage, imaging, medicine, or sensing - needs to be capable of churning out large quantities of nanocrystals where each batch is produced according to the exactly same parameters. Because certain biological molecules are capable of molecular recognition and self-assembly, nanocrystals could also become an important building block for self-assembled functional nanodevices. 🔓 31 💚 1 🔥 1 12-Jul-2022 https://t.me/c/1688716656/171149 Kimberly Reply Lily Blu What are quantum do... Just ANOTHER person whom makes claims using my name to get people to go down a rabbit hole. He also has some very "bias" stand points on certain cities or people I have noticed "all people who live in "that city" are bad and evil". You can't say that about any city anywhere in the world, especially since he lived there long ago, and there are good people everywhere, and some bad too. Bottom line, if you do not LIVE AND WORK in Africa, you can't participate in the restoration of africa. The only exception is if an African person decides to use technology, source raw materials not found locally, or a construction company etc. which comes from abroad. Lifeforce is about PERSONAL RESPONSIBILITY for each persons community.

Only to see if I could make hemp into a water soluble form as it is a whole source of amino acids (protein). I was working on an all natural energy drink which contained, hydration, amino acids, russian ginseng (immune booster it is a berry not a root), b vitamins, ashwagandha and several other things for an all natural boost all around with zero "buzz". Energy drinks are so unhealthy, so I was looking for one that tastes good but feeds the body and gives you an energy boost with no crash and your body is better off for it! So some yes but it was mainly for a whole food source.. Since hemp is basically a weed, it grows like crazy in a short period of time and can be used for paper products (paper plates/cups, paper, rope, building blocks and much more). Actually the Navy used it for anchor ropes years ago and it proved to be the strongest material! Also I have done a lot of research on Larch Wood, silica sand and limestone "crete" for building ports/levees/water diversion. So I have a wealth of information for free energy and much more.. I stopped, like I said as everything I was doing was being stolen and attempted to be replicated or used for evil. So yes, my goal is to finish this war, launch the new system and go play nutty professor in a lab for the rest of my life creating! d 35 d 14 € 9 ⊕ 8 ♥ 6 ⊕ 2 6:40 PM Reply Forwarded from General McInerney MarkFriesen The Grizzly Patriot @MarkFriesen08 Better start reading labeled folks. Here is my experience for what it is worth: Each culture has many things to offer the world, medicines, spiritual teachings and so forth. However, when it comes to the American Tribes I have had zero luck with any of the Tribal Councils. They are so CIA-afied, take back the land blah blah. We are not going backwards period. I find similar instances, although not quite as bad in Latin America. Africans, the REAL tribes (anglo american created their own kings and they are horrific) are pretty amazing in my experience, but also fairly simple and the real leaders here just want to take care of their people. Russian tribes are also pretty amazing people. I have run into a few others you would consider Tribes, like Cashmere who are "normal"

In the transition to restoration document I wrote that Kelly dismissed, I included widespread growing of hemp as it is so good for the soul and water and health and stuff!!!! I have another idea.... Baobab coffee... when I lived in west Africa, ladies in the market made and sold a drink, baobab juice and they throw away the seeds. I took some, washed and dried them in the sun then roasted them, ground them and put them in my expression machine and the result was a delicious nutritious coffee type drink which I was very excited about.... My idea is to invest in health and safety measures for the pickers (people regularly die falling out of baobab trees) and in tree guardians so people are encouraged to respect the trees. It can easily be done.... All u need is to employ people to work at market with scales.... Pay people for the weight of what they bring and voila we have our seeds.... They can be processed in Africa too....So the people get decent income for their work... § 13 ♥ 3 4 2 6 1 5:56 PM 19-Jul-2022 https://t.me/c/1688716656/178685 Kimberly Kisha-Beth Salmon 19-Jul-2022 https://t.me/c/1688716656/178686 Love this idea, Kim!!!! Energy: 1) The government has a limited role in general, except for a few public orgs such as BPA and TVA. Energy is for-profit companies. 2) Heads of all these companies are probably on the payroll or otherwise completely compromised. However, the regular people in these companies have zero notion of the things you are dealing with daily, and would not believe us if we told them. 3) But they are good, hard working, and pretty smart at what they do. 4) All we need to do is get the bad decision-makers out of the way, and the regular people whom run the networks will just keep doing what they do. 5) They only need to be paid a salary to do this, to take care of their families. 6) It is so ingrained in their DNA that "we never let the lights go out", that the transition could be managed pretty well. The workers just need to know whom is paying their salary and that their old bosses are irrelevant. This will not be difficult, because the bloodline attitude has put completely incompetent people in top roles, and the workers know that they make very bad decisions. I could walk into any of these companies tomorrow and start handing out paychecks and we could take a company into the hands to the regular employees very quickly. If their previous bosses were at the same time telling them that they

The main issue is those top politicians who thought they owned the nation and abused their given authority. Yet there are many loop holes that lobbyist frequent visit. Some politicians even went to the extent of changing the national constitution and aprove laws that further strengthen their position. I am aware what Kim had mentioned about Marduk and gangs plots and how they distribute their plans via the parents wings of control. Since This top evil had dealt with. It is down to those politicians (I hope). Civil servants are to serve the public not the other way round. They just take orders and do their job. We say that he likes to hear the sound of his own voice way too much. We decided in our waking process that he talks in circles and has said nothing. Another guy that seems to like his voice snd be full of himself is that street fighter guy. The street fighter/ tomahawk guy seems nice but sure is full of himself. When I first found Kim video and was wanting to hear more, I asked if he could interview Kim. We were praying for guidance and every time I did Kim videos and her group would literally pop up out of nowhere on my phone when I was researching. It was older stuff so we thought all those fighting the cabal would definitely be interested in interviewing her, cause it seemed like all These speakers were missing something. Street fighter called her a cult leader and the others would not touch it. That in itself spoke loudly. She was more censored then the rest. But her actions spoke louder than her words and felt like source was answering our prayers by making her name and her team members videos popping up without searching. Now I dont think all those speakers are on the trump train are dirty. Some yes, like Juan, Charlie. Others I feel like they really want to make things right but are caught up in the popular Q movement. I have seen it work for anaphylactic shock, and in emergency situations (while diving in Hawaii) when nothing else was available. I also know people whom have been in the woods etc and ran out of water who have done it and noticed the benefits of it and continue to do it to this day. Not everything is for every body, it is mentioned by Dr. Group as a Naturopathic Doctor and he is not saving it is the end all be all, but tells of the benefits. Its not for me personally, but in an emergency sure it would be. As for the medical medium I have read several of his books and done his cleanses and celery juice as well. So I see those benefits too, I also still drink his heavy metal detox shakes a few times a week, but I am also a fan of things like chloroxygen, but that is me. I like red light therapy too. Dr. Group's products are potent, I take his vitamin B but find I only need half the dose I would take from someone elses, and his Intramax Minerals the same. I like his line of products because they actually contain what they say. Further, in my experience you only absorb 30% of a pill, more if it is in a veggie cap, and more if it is in a liquid and more if it is in a sublingual and even more than that obviously if injected (vitamin therapy). As far as "vitamins" are concerned not all are created equal, but Dr. Group's are amongst the best I have seen in that realm. As far as "food is medicine" Medical Medium is fantastic at explaining that, and if we had "real food" available he is right, but alas unless you are growing it yourself we don't. Just my opinions Mary. I also know people whom didn't have any benefit from celery juice, so we are telling people about options, and of course you have to choose what is right for you! Much Love and Health to you Mary! 47 👍 16 🥰 6 🔥 1 6:22 AM
