While talking on the phone with a friend earlier I felt a dark and ominous entity being released from a hidden place....I have felt dark energies but this was just awful. I then felt and saw in my minds eye a scurrying of beings take it out...I was then told that there are two more of the dark entities to be found and taken out of the next few days.
So relieved we have this sort of assistance...very grateful indeed

 Nigeria's physical currency printer is DeLaRoux, unless they are re-printing worn out bills I doubt it. The Federal Reserve ran the currency itself, and doesn't have new allocation numbers for printing. DeLaRoux is a Rothchild run facility and prints for most all of the African Continent, South America (except Venezuela), Asia and the Middle East.

 Yesterday it was me, these particular folks were pretty bad...even the enforcer wouldn't touch them. There were several of them all working together. Some were sending us bacteria, others affecting the nervous system and pain receptors, others hacking computers in tandem with the remaining 400 or so. The "clean up" of them being undetected for around 72 hours is what I was doing yesterday.

 Yes. It's great. I finally solved the issue I had about PayPal billing by paying for a full year directly. And I now get email messages straight to my inbox that make me feel happy and that I welcome. Even with the price rise it's an incredible value-for-money service. Previously I paid \$41510 per month. It's not much more now

KIMBERLY GOGUEN'S TELEGRAM POSTS - DECEMBER 2022

Previously I paid \$20510 per month. It's not much more now. If you're struggling financially it would be a hike, but within the big picture it's simply a small support payment toward global restoration, and not even the cost of a breakfast for one staff member per month. ☀️

Again, my prior message was pinned. 1) You ALWAYS were on the "honor system" to those who work HARD to bring you the news.. so it wasn't FREE, and it certainly is NOT FREE to us, we paid a LOT of money to upgrade this platform, we also paid A LOT of money for TB of storage, software, hardware etc. 2) The news is FREE 2x per day for those that can't afford it. 3) If you can find a "free app provider" and suggest a way for people who work 10 to 12 hours a day to bring you the news to have FREE homes, FREE food, FREE transportation, then I am all ears.. Until then the news is 8.99 for news, original series, interviews and much more.

Within the next week-10 days we're going to absorb a type of neutrino's that are 10x stronger than normal increasing to 100x the magnitude of what already passes through our planet and humans, they will interact on a level of quantum entanglement called hyperNeutrons
Essentially, these new forms will reduce the spacial proximity of cells for better absorption of source light data!

This phenomenon occurred billions of years ago when several different stars went supernova destroying a few galaxies... the mixture of elements created this occurrence.

" it's source's gift to our galaxy!
With this influx it will accelerate our planet/human growth!

 We all have struggled with various things throughout our life. Yet the majority of us get up and make life work, we can (because of UNN) offer things like Folium Relax and other solutions which help with depression, solutions which work to cure the problem. Some of which we have provided for FREE to those in need such as yourself. However the chatter on this chat is insane right now with others being brutal to one another. I am sure you are in need of "kindness" and so are we. By "we" Admins, our UNN team, others on this chat.

 I'd love a series dedicated to dental health (without dental poisons to strengthen teeth). Alternative ways to prevent cavities and strengthen teeth and how to develop a routine. Thankyou. 😊😊

Sorry I won't have time to read too much on this thread, but ill try. However I can listen while I work which is why I'm loving the news and updates. Unfortunately I'm going to have to go back to read the essential oil part of all the news videos.

I am getting many complaints again about people squabbling on the chats. If you are here to demand answers or proof from Kim, Argue, Disrespect the admins or others on the chat you will be removed without further notice. If you or your post is removed please don't PM me, Kim or the admins to fix it or argue. The admins have been advised to block those that do. For those that want to say it's a "Free Speech" thing then I would recommend creating your own platform, but while here, please follow the guidelines. Keep in mind not all questions can or should be answered here.

And for God's sake please STOP PM'ing Kim for things that just don't matter. It's an honor to have "Ground Command" on this chat. Please respect Kim's time and position and don't make her regret being here.

Well people are "free to speak" we are also free to decline to take on the negative energy behind some people's words. I don't have to

KIMBERLY GOGUEN'S TELEGRAM POSTS - DECEMBER 2022

accept an "attack", and we don't allow that on here. This is a place to talk and discuss all things CARE and Restoration, and to help one another. There are several folks who have "left" this group that have created chats where people whine and complain, and we just suggest perhaps that is the place for those people. Its ok to talk about problems you are having if that is what people decide to do, but attacking others including our admins is not tolerated. Are we stopping "free speech" no. We simply don't tolerate negative attackers who clearly want to start an argument.

 Kim - I understand how busy you must be. So I figured perhaps you could make a note of a video recommendation for later viewing at your pleasure. I've seen my fair share of Super Soldier Interviews, but the latest one I thought you would find pretty cool. We have a young woman in this one they call Skully. Her lineage is from the last planet on the furthest end of the pleiades constellation. She has lots of abilities, she has a PhD, she led all kinds of missions mostly bringing soldiers through Stargates such as Iraq. But here's where I thought of you and wanted to know your take. It appears her vivid memories occurred starting in 2017. She went to Iraq through a Stargate mission and the date was 2024. She fought AI that looked like the terminator. Nuclear bombs of some sort had been dropped, and these terminators which were AI based were destroying everything in their field of vision. James Rink asked her if it was a parallel reality or a timeline that's in our future. She believes it's ours, because, if I heard her correctly, she was sent there multiple times to fight the AI. When asked how soon. She said January 12 or 13 next year in 2023. When James asked her her take on the Ukraine War, she said it wasn't the Ukrainian Soldiers against Russians, as she explains further that they are "cool with each other" According to her, the real story is that these AI terminators are on the ground and that they're fighting to stop them from taking over the planet. What? Anyway, here's that interview: pleiades

When you are ready, it is easier. I find people that may have watched her a few years ago were confused, but now it all makes sense! Her teachings are spot on! I'm counting on all of you to put me out of a job and learn to manifest all on your own!

Are there any dangers as far when it comes to ingesting monoatomic gold?

I was taking it for a while and I loved it but stopped because I got scared of what others were saying about it on the internet.

When I was taking it, it made my meditations much easier and also heightened my intuition.

But I had to become super disciplined when it came to controlling my energetic state because I noticed that I would manifest things quicker and the outcomes would depend on my energetic frequency:

Like if I was in high spirits, grateful and content, I would manifest good things in my life quickly and easily.

But if I was feeling low, like indulging in self pity or fear, bad things would manifest quickly as well.

Was that because I was taking the monoatomic gold?

Ms. Kimberly after watching the 12/17 Interview this afternoon, three things have come to mind which need to be addressed after this coming week of changes. First of all (and I hope I am wrong) 50 percent of people who follow your news and 80 percent of the population will not understand what has happened. Would it be a good idea to explain what is now and future on a basic level on planes of existents, finances, vibrations, and government without going into past changes just to cut down on confusion. Two, there are and will probably always be folks who want more than they deserve, without doing the work. Those which may resort to very negative means to take or get what they want. Thus, hurting less protected individuals around them. How can we deal with supporting local and state policing if tax dollars are removed from policing organizations and groups? There is an old saying, "Laws are created because of the doings of the 8 percent". In the past 5 years, this number has increased to 15 percentage. This will probably lead

KIMBERLY GOGUEN'S TELEGRAM POSTS - DECEMBER 2022

to addressing welfare groups too. Third, is it possible to develop the projects and answers in the first question without the current governments and military leaders taking credit for the new ways? If what I have seen in this US administration, they love taking credit for good things others have done and placing blame on others for what wrongful things they have done.

 Over time they will understand, if you think of the light as a "gentle parent" guiding the kids (us) into a better way. Some of us get it right away others need a little more nudging. People will begin to feel different, more intuitive, more guidance, and overall "healthier" more energy. IN THE PAST- when a human would get "too light" the kronos archons/etherical implants would kick in and drag them back down. This is also the reason why successful people would reach a "monetary glass ceiling" unless you were a member of "their society". It was also the source of black magic for them. As far as governments are concerned, they will either restructure under the new timeline or eventually dissolve. Like I said the new light way won't tolerate dark oppression here, same with banks and any other pieces of the "system" we lived in. Its ok that for many it will take time, but for the few that truly understand it, this is your time to guide people into a better way, a better future. Its ok that CARE has a few thousand people lighting the way, that few thousand will grow to around 200k. "if you build it they will come". That is all that is needed to effect change globally. People will see how its different and respond. You WILL ALWAYS have those who will try to abuse the system, but that is for them to sort out not us.

We also post the news to our channel for subscribers and offer it for rental at 1.99. Unfortunately when we left it up to everyone to honor the work done by many people to bring you the broadcast we were struggling to meet our monthly expenses, with this new app it is VERY expensive, and much better. Many people who did subscribe were questioning what they were getting if the news was FREE. We also had to add DRM because we were being screen recorded every where. Stealing if you will. We tried to use the "honor system" we honored all of you by leaving the news free and the world didn't honor us by respecting our time, our efforts and our expenses. We were on YOUTUBE in the beginning and were kicked off hence the need for our own platform.

 We are doing our part with what we have. Soon that "we have" will be a lot. Then what happens with the world? I do understand there are many who can not afford it. I have been there myself on this journey, as they did everything they could to break me. I worked for cash under the table most of the time just trying to raise my daughter. I was "shoved" out of the "system" and if we didn't do our job then the "system" would have shoved all of you out too with ID2020.

 Before I was shoved out, I had built and sold 3 successful businesses. I was making upwards of a million dollars a month at their peak. I hit their radar in 2010/2011 and spent most all of my savings traveling around the world to all these locations the "CIA skills" only touch on in videos. I'm nonoured that I can support you and the team and at the same time gaining what's really important. I'm glad you survived all that was thrown at you. Lasts decades I have been observing devaluation of work/ services, like what we do is worth nothing, be happy that you received at least something. Can't agree more that it's time to change the narrative/ programming. Time to respect each other, for who we are and what we do. I have trust in humans, we will make it.

 In history, what has happened here has never been done before, not anywhere. We have taught many others as they begin to clean their own "houses". What we have NOT done yet, and is yet to be seen, can we become productive members of the multi-verse? can we RESTORE humanity to its former glory? We have a lot of work to do

 This isn't about "lack" for any one group or another, this is about positive contribution to the collective consciousness. Each person is responsible for their selves, their own actions and this causes a ripple throughout the multiverse. Put simply, you have everything to offer.

I used to think that because you work for God you'd have everything provided for you, the fact you paid for all the flights yourself is wild, I feel like I understand how God works much more now, it totally doesn't make sense to have everything provided, it makes sense for you to be protected with the light but not have everything provided that's not how God works, we need to do it ourselves.

Perhaps Sunny could ask her the question How can Kim be in Israel twice on Christmas eve and be in Durango on Christmas day cooking Beef Wellington? I've Trusted The Plan. I've seen Y2K. I've seen 12/22/12. I've seen It's Happening Soon. I've seen CGI pictures of Med Beds. No pictures of the computers Kim uses. Sunny does the news out of her garage. Why does Sunny have to do the news out of her garage? Never a straight answer. I try to "believe" but my skeptic meter is going off the charts. I suspect that other people are asking the same questions, too.

To me it's more the point... not the \$8. Especially if she is in charge of the Alpha System which she claims to be . The most important messages she has been bringing in her updates on Rumble for example on MWF are now completely lost.
I also am curious since she won't be funding the \$1.7 trillion, will that affect the "in 30 days" there will NO longer be a VAX mandate for the military that was made part of that bill and most likely why the 18 Republicans maybe voted for it...
Has this point been brought forth by Kim or Sunny yet. We don't see the updates any longer...

You can find the updates on www.unitednetwork.tv and if the \$8 is "the point" then watch at 6pm EST or 6am EST. Then you can get the updates for FREE. None of the bills have been funded for years now, they have begged borrowed and scrapped the barrel to keep the lights on.

The rings, in the Orthodox tradition, mean much, much more than simply, "I love you". We wear wedding rings on our right hands because the Lord's right hand makes firm the foundations of the earth. Moreover, the rings symbolize God's word to remain faithful to us.

 At the moment the timelines met. I felt that too. It wasn't a sense of "I loss something" it was more of a sense of seeing what would have happened if we lost.

 I am looking for the announcement made in the Epoch Times article Kimberly read from on Wednesday, that must have been such a massive bombshell... saying "Any US dollar bank notes printed before 2021 will no longer be accepted or legal tender anywhere in the world." I am baffled because all I can find is stupid fact checkers' comments, so it was carefully deleted. Did anybody find a link to the article on the way-back-mashine?
